

Philips
Faro design cordless phone

30 min answering machine
1.8" display/white backlight
Hands-free speakerphone

M7751B

A new form of conversation

The boldly sculptured Philips Faro elevates cordless phone design to a modern art form. Refined lines unify the phone with its secondary base display. Enjoy smart functions like instant access to speakerphone and easy alarm snooze.

Exquisite design with high quality execution

- Finely crafted, bold and sculptural
- Secondary display on the base shows caller ID and clock
- Charge handset either way around
- Calibrated, seamlessly integrated keys for precise dialling

Ultimate calling experience

- High-contrast 4.6 cm (1.8") white-on-black graphical display
- HQ-Sound: high quality acoustic engineering for superb sound
- Instant-access speakerphone for easy hands-free chats
- Easy-access snooze button for extra sleep time
- Black list, anonymous call, silence mode, call barring
- Up to 30 minutes of messages on your answering machine
- Visual ringer flashes to alert you of incoming calls
- Hearing aid compatible - reduces unwanted noise

PHILIPS

Faro design cordless phone
30 min answering machine 1.8" display/white backlight, Hands-free speakerphone

M7751B/38

Highlights

4.6 cm (1.8") graphical display

A high-contrast, white-on-black reverse LCD display ensures easy reading and also blends perfectly with the Philips Faro overall sleek design language.

Bold and sculptural

Finely crafted, bold and sculptural

Calibrated keypad

The calibrated keypad allows you to clearly feel every keystroke whenever you are dialling a number or entering a contact from your phonebook. Detailed study of keypad materials and structures, as well as extensive user tests, have resulted in the right balance between the key pressing force and the key response to ensure precise dialling

Easy alarm snooze

At the touch of a dedicated button on the base station, you can easily respond to the alarm and choose to snooze for a few more minutes — for up to a maximum of 3 times. Just set the easy alarm feature and ensure that the handset is docked in the base station. An icon on the base display will indicate that the alarm has been set.

ECO+ mode

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation the radiation drops to zero.

Extended privacy settings

Black list restricts receiving calls from specific numbers or starting with certain digits, keeping unwanted calls away from you away. You can block 4 sets of numbers. Each set of numbers can consist of between 1 to 24 digits. When there is an incoming call that starts with one of these numbers or being one of 4 exact caller numbers, the phone will not ring. With silent mode you can disable ringtones at specific times to enjoy peace and silence. Thanks to call barring, you can avoid expensive phone bill surprises by blocking calls to specific numbers starting with certain digits.

Hassle-free charging

For reliability and convenience the handset can be charged in both directions of the docking station.

Hearing aid compatible

This feature enables the phone to couple with the hearing aid to amplify conversation while reducing ambient noise and the buzzing, humming or whining noise that can otherwise occur.

Instant-access speakerphone

The phone's built-in loudspeaker amplifies the caller's voice so that you can enjoy conversations hands free. This allows you to multitask while taking important calls. Just hit the dedicated speakerphone button on the base station and start your hands-free conversation with the handset docked. The smart speaker design on top of the handset guarantees superb sound delivery in speakerphone mode — always.

Secondary display on the base

The Philips Faro high contrast white-on-black display seamlessly and stylishly integrates with its base. The display shows the caller ID when there is an incoming call and the time when in idle mode. You can choose to turn off the base display so as not to be disturbed by any light at any time.

Up to 30 min. recording

With 30 minutes' recording time on your answering machine, you'll never miss an important message.

Visual ringer

Become aware of any incoming call with the smart visual ringer feature. The display and keypad backlight flash so you know that a call is coming in.

Specifications

Sound

- Ringtones on handset: 10 polyphonic
- HQ-Sound
- Volume control on handset
- Hearing Aid Compatible
- Sound Profile: MySound

Picture/Display

- Backlight: Yes
