# Highlights

## Control

The Smart Home add-on kit contains the starter components you need to create a smarter, more convenient and safer home. It includes four devices and the Philips Smart Home App, which turns your Smartphone into an intelligent controller of all your selected smart devices in your home. Easy to use, you can monitor and control your lights, electrical devices and small appliances anytime and from anywhere.

## Automate

The Philips Smart Home app transforms your smartphone into an intelligent controller of all your smart home devices. It easily guides you to add devices, customize rules and settings and lets you check, control and automate your selected appliances and devices. Once you set up the sensor and rules in the app, you can easily switch on or off bulbs or devices that are powered by intelligent switch, such as heaters or dehumidifiers. Keep your home at an ideal comfort level at all times. At any time, customize the app to suit your preferences and create a smarter home for you and your family.

## Check

Philips Smart Home add-on kit lets you see what's going on at home – anytime and from wherever you may be. Protect your property and family by monitoring your home all day. Alerts can be sent to you when there is unexpected movement or when doors or windows are opened – even while you're away or asleep. You can even track when certain areas or your valuables are being accessed; when devices or appliances are left on; or if there are changes in your home's temperature and humidity. Create a smarter and safer home with this total solution for you and your loved ones.
