2 Get started

Caution

 Use of controls or adjustments or performance of procedures other than herein may result in hazardous radiation exposure or other unsafe operation.

Always follow the instructions in this chapter in sequence.

Install the car audio

These instructions are for a typical installation. However, if your car has different requirements, make the corresponding adjustment. If you have any questions regarding installation kits, consult your Philips car audio dealer.

Caution

- This unit is designed for negative ground (earth) 12 V DC operation only.
- Always install this unit in the car dashboard. Other locations can be dangerous as the rear of the unit heats up during use.
- To avoid short-circuit: before you connect, ensure that the ignition is off.
- Ensure that you connect the yellow and red power supply leads after all other leads are connected.
- Ensure that all loose leads are insulated with electrical tape.
- Ensure that the leads do not get caught under screws orin parts that will move (e.g. seat rail).
- Ensure that all ground (earth) leads are run to a common ground (earth) point.
- Use only the supplied mounting hardware for a safe and secure installation.
- Improper fuses can cause damage or fire. When you need to change the fuse, consult a professional.

Note on the power supply lead (yellow)

 When you connect other devices to this system, ensure that the rating of the car circuit is higher than the total fuse value of all the connected devices.

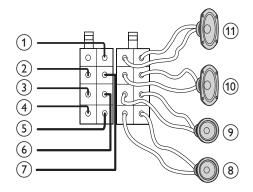

Notes on speaker connection

- Never connect speaker wires to the metal body or chassis of the car.
- Never connect speaker wires with stripes to one another.

Connect wires

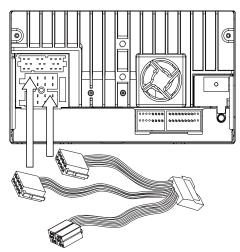

Caution

- Ensure that all loose leads are insulated with electrical tape.
- Check the car's wiring carefully, then connect them to the two supplied ISO wires.

2 Connect the other end of the two ISO connectors to the car audio system.

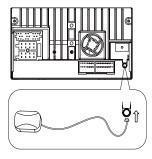

3 If necessary, do other connections:

Connect GPS antenna

To receive signal from satellites, connect the supplied GPS antenna to your car and the system.

1 Connect the supplier GPS antenna to the system first.

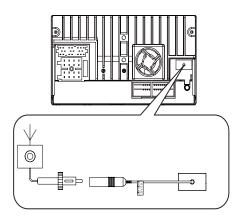

2 Stick the other end of the GPS antenna to a metal surface of the car.

Connect GPS antenna

If your car has built-in radio antenna, connect it to the radio antenna of the system for better radio signal.

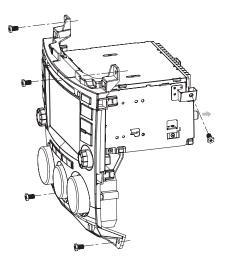

1 Connect the radio antenna to the car antenna.

Mount in the dashboard

Note

- Check wire connections before you mount the unit into a car.
- If preset radio stations are lost when the ignition key is turned OFF and then back ON, reconnect the red leads crosswise to the yellow ones.
- 1 If the car does not have an on-board drive or navigation computer, disconnect the negative terminal of the car battery.
 - If you disconnect the car battery in a car that has an on-board drive or navigation computer, the computer may lost its memory.
 - If the car battery is not disconnected, to avoid short-circuit, ensure that bare wires do not touch each other.
- 2 Ensure that the horizontal slant of the car dashboard opening is between 0 and 20 degrees. The unit cannot be used if the dashboard opening's slant angle is above 20 degrees.
- 3 Install the mounting bolt and place the supplied rubber cap over the end of the mounting bolt.
- 4 Slide the unit into the dashboard and fix it to the car with five screws.

5 Reconnect the negative terminal of the car battery.
