Highlights

Digital Media Reader

Digital Media Reader provides you the convenience to directly plug in the memory cards (CF Type 1, SD cards, MMC, MS, SM) in the DVD player or TV to view and share your favorite photos with your friends and family. No more hassles in cumbersome connections or expensive adaptor cards.

108MHz/12 bit video processing

Video Upsampling is a technology that decreases distortion to dramatically improve picture quality. It is a technology that allows the normal 13.5MHz video signal to be up sampled to 8 times the frequency.

192kHz/24 bit audio DAC

192KHz sampling enables you to have an accurate representation of the original sound waves. Together with a 24-bit resolution, more information is captured from the original analogue sound wave form, giving a much richer audio reproduction.

Multi-format Movies-DivX, MP4

Multi-format playability allows you to play most disc formats for maximum compatibility and viewing pleasure.

Multi-format Music memory card

Multi-format playability allows you to play most disc and MP3 music from card formats (Compact Flash Type 1, SD cards, Multi Media Card, Memory Stick, Smart Media) for maximum compatibility and listening pleasure.

Multi-format Pic Memory Cards

Multi-format playability allows you to play most discs and MP3 music from the following card formats (Compact Flash Type 1, SD cards, Multi Media Card, Memory Stick, Smart Media) for maximum compatibility and viewing pleasure.
