- DAB and FM compatible for a complete radio experience
- Digital tuning with preset stations for extra convenience
- Built-in speaker to enjoy radio out-loud in good sound

Easy to use

- Quick scan of DAB stations for extra convenience
- Low battery indicator keeping you informed of power level
- Mains or battery operated for flexible placement

PHILIPS

Highlights

DAB

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear and crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be found. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

DAB and FM compatible

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be found. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Built-in speaker

A speaker offers good sound quality for more pleasure.

Quick scan of DAB stations

DAB (Digital Audio Broadcasting) digital radio is, on top of FM analog transmission, a new way of broadcasting radio via a network of terrestrial transmitters. It provides listeners

with more choices and information delivered in clear and crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can be found. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no returning on the move.

Low battery indicator

The low battery indicator lights up when the power is low.

Mains or battery operated

Power your Philips radio set with batteries or a direct mains supply, and enjoy great convenience and flexibility. When a power socket is not available or when you don't want unsightly wires trailing, simply operate the set with batteries. When you need a continuous and stable power supply, connect the set directly to a wall socket. Now you can truly enjoy the freedom of listening wherever you like.
