- Talk time: 10 hours

## Network Features

- Antenna: Integrated on base, Integrated on handset
- Dialing: Tone, Pulse

## Memory Capacity

- Name & number shared phonebook: 10 numbers
- Call log entries: 10

# Highlights

## CS<sup>2</sup> Crystal Sound System

Philips' unique Crystal Sound System (CS<sup>2</sup>) audio technology improves the sound quality of Philips DECT phones. CS<sup>2</sup> audio quality is demonstrably better than competitive DECT products and brings with it distinct benefits.

## Instrumental ringtones

Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.

## Caller Identification

If you want to know who's calling you before you answer the call, then Caller Identification is for you. You can see the number (or the name) of the person calling, allowing you to decide whether to answer the phone or not. Caller Identification cannot disclose the number if the number is withheld, or unavailable. This service is country and network dependant, and requires a subscription to your network operator.

## Paging key

Instead of looking in every corner of the house, simply call the handset from the base by pressing the dedicated key on the base station and the handset lets you know where it is hiding.
