- Master carton weight: 10.6 kg
- Product dimensions (WxDxH): 614 mm x 172 mm x 272 mm
- Set weight: 8.83 kg

# Highlights

## Wireless Streaming with PC

Using a Wi-Fi network, enjoy your favourite songs as they continuously stream from your PC's music library to the Streamium Wireless music centre or to the station(s), or from the Streamium centre directly to the station(s). Whether your audio collection is stored on the Streamium or on your PC, you can fill your entire home with the same song or play a different track in each room — the choice is yours. There are no wires, no cables and no hassles. Enjoy the freedom of listening to all your audio anywhere you want in your home.

## Enjoy Internet Radio

Internet radio is an audio broadcasting service that is transmitted via the Internet. One of the most popular formats is MP3. Some Internet stations are affiliated with a 'terrestrial' radio station or network while others are Internet-only radio stations, which are independent and devote their broadcasts only to the World Wide Web. With Internet Radio, you can enjoy access to online radio stations from anywhere in the world and listen to a wide variety of genres; get news, sports and entertainment updates, or connect to favourite or niche stations from Austria to Ukraine.

## My Room, My Music

With My Room, My Music, each member of your family can select and play their favourite music from the stored collections in the Streamium Wireless music centre. Multiple User Access technology simultaneously streams music selected from the Streamium centre to the station. One Streamium can stream music to up to five stations, giving you six different music options for the whole family to enjoy in any room — simultaneously and instantly.

## Music Broadcast to Stations

Be your own DJ at your house party and simultaneously broadcast your favourite dance music from the Wireless Music Centre to all Wireless Music Stations installed in various parts of your home. Great for parties!

## Music Follows Me

The Music Follows Me feature allows you to take your favourite music from room to room in your house without having to restart navigation and playback of that particular track. At the touch of a button, your favourite song will follow you anywhere you go in your house.

My room my music

Music follows me
