Product highlights

30 frames per second video

With a 30 frames per second refresh rate you will enjoy natural-looking and full motion video calls without jumpy images some webcams produce.

VGA snapshot resolution

The VGA resolution of your snapshots ensures sharp images for use in documents, webpages and e-mails.

Works with all IM services

Add video to Yahoo!, MSN and AOL Messenger. This PC Camera also works with Windows Messenger and NetMeeting.

External microphone included

With a separate external microphone, you have the freedom to place it where it best picks up your voice for relaxed on-line video chatting.

Works with imaging software

Capture VGA-quality (640x480) snapshots and flicker-free video clips for video mails. This PC Camera works with all available imaging software such as Arcsoft's VideoImpression, Adobe Photoshop ... and many more...

Snapshot button

With just one press of this button, your webcam takes a picture automatically - ready for adding to e-mails, web pages or documents.

Rotating lens

Rotating lens for perfect aiming and natural images. You can get the right camera angle quickly and easily without having to put things underneath it to change the tilt.
