Highlights

5-in-1 remote control

The universal remote control allows you to programme and operate up to 5 devices from almost any brand. A universal database of infrared codes is incorporated to enable easy installation of your TV, TV combi, VCR, DVD, DVD recorder, satellite or digital terrestrial receiver, cable decoder, amplifier, home theatre system or receiver.

Learning functionality

Learning functionality refers to the process through which a remote control captures and stores infrared signals from other remotes for later use. When device codes are not included in the on-board database, they can always be learned from the original remote, simply by pointing to it.

Channel icons

The remote control incorporates a library of channel icons for most countries' main TV stations. Via the colour LCD screen, you can programme the right channel icons for the right channel. Once set up, you use the LCD screen info to flick through your channels using the icons of TV stations instead of the digit keys on your remote.
