- Internet radio to enjoy the world of online radio channels
- Dock ready for convenient playback from your iPod /iPhone
- Turn your Smartphone into a remote for Philips AV products

PHILIPS

Highlights

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

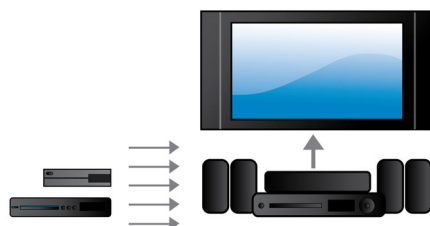

Instant 2D to 3D conversion

Enjoy 3D movie excitement in your home using your existing 2D movie collection. Instant 3D conversion uses the latest digital technology to analyze 2D video content to distinguish between foreground and

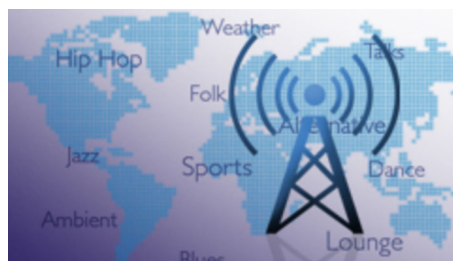

background objects. This detail generates a depth map that converts normal 2D video formats, into exciting 3D. Along with your compatible 3D TV, you are now ready to experience full HD 3D.

HDMI x 2

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio HDMI x 2 output to the connection in your non-3D AV receiver.

Internet radio

Internet radio is an audio broadcasting service that is transmitted via the Internet. Some internet stations are affiliated with a traditional (terrestrial) radio station or network while others are internet-only radio stations, which

are independent and devote their broadcasts only to the World Wide Web. With Internet Radio, you can enjoy access to online radio stations from anywhere in the world and listen to a wide variety of genres, news, sports and entertainment updates, or connect to favourite or niche stations.

Philips MyRemote

The Philips MyRemote app lets you use your smartphone or tablet as a remote to control your Philips AV products that are connected to your home Wi-Fi network, and gives you instant control from anywhere in your home. It also comes with useful functions such as SimplyShare to connect and stream all entertainment wirelessly; and MySound to customize your listening preferences.
