Note

- Press and hold ■ for two seconds to remove a connected storage device safely.

5 Set up a network

By connecting this player to a computer network and the Internet, you can

- Play photos, music, and video files streamed from your computer.
- Watch online TV programs.
- Browse Internet photo albums.
- Update the software of this player through the Internet.

Wireless network setup

What you need

A wireless router that is connected to the Internet

- 1 Connect this player to a computer network or the Internet through a wireless router.

- 2 Perform the wireless network installation.

- 1), Press **⬆**.
- 2), Select **[Setup]** and press **OK**.
↳ The setup menu is displayed.
- 3), Select **[Network]>[Wireless] > [Connect]** and press **OK**.
↳ A list of available wireless networks is displayed.
- 4), Select your network from the list and press **OK**.
- 5), Enter your WEP or WPA key in the mini keyboard and press **▶||**.
↳ A connection test is started
↳ The status of network connection is displayed after the test is completed.
- 6), Press **OK** to exit.

Note

- To re-scan available wireless networks, press **⏏**.

Wired network setup

What you need

A wired router that is connected to the Internet

- 1 Connect this player to a computer network or the Internet through a wired router:

- 2 Perform the network installation.
-

- 1), Press **▲**.
 - 2), Select **[Setup]** and press **OK**.
 - ↳ The setup menu is displayed.
 - 3), Select **[Network] > [Ethernet] > [DHCP IP (AUTO)] > [DHCP (AUTO)]** and press **OK**.
 - ↳ A dialog box is displayed.
 - 4), Select **[Yes]** and press **OK** to save the network settings .
 - ↳ A connection test is started.
 - ↳ The status of network connection is displayed after the test is completed. .
 - 6), Press **OK** to exit.
-

You can set the IP address manually.

- 1 Select **[Network] > [Ethernet] > [FIX IP (MANUAL)]**.
 - ↳ The IP address table is displayed.
- 2 Press **◀▶** to select a item and press **▲▼** to adjust the value.
- 3 Press **OK** when you complete setting the IP address.
 - ↳ A dialog box is displayed.
- 4 Select **[Yes]** and press **OK** to save the network settings.

6 Play media files from a computer (DLNA)

With this DLNA-certified player connected to a computer network, you can play video, music, and photo from a computer.

Note

- To browse media files on a PC, make sure that a DLNA media server software (such as Windows Media Player 11 or higher) is installed on the PC.

- 1 Connect this player to a computer network (see "Set up a network").
- 2 On the PC, in the software of the DLNA media server (such as Windows Media Player 11 or higher), you need to set:
 - ① **Share your media to this player** (see "Help" document in the media server software).
 - ② **Share files or add files to the library** (see "Help" document in the media server software).
- 3 Press **▲**.
- 4 Select **[Network]**, and press **OK**.
 - ↳ A content browser is displayed.
 - To browse shared folders of a PC, select **[Shared Folder]** and press **OK**.
 - To browse shared media files, select **[Shared Media Files]** and press **OK**.
- 5 Select a media file, and press **OK** to play.
 - To access the menu of browsing options, press **☰**.
 - For details, see "Browse all files".

7 Internet Services

With this player, you can access online various services, such as movies, pictures, music, and games.

What you need

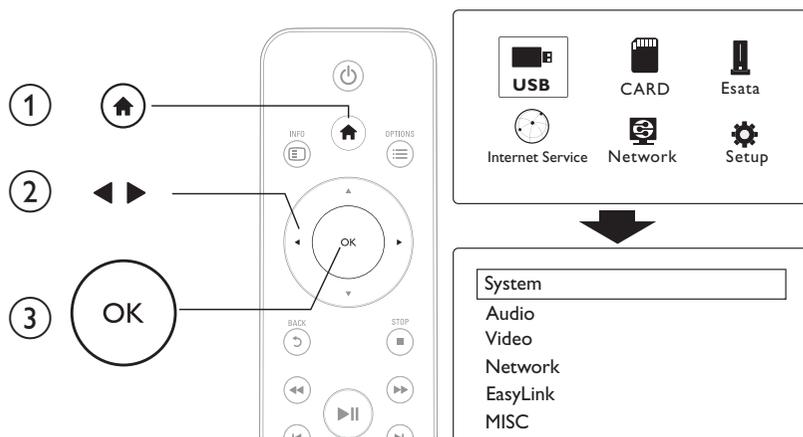

Connect this player to the Internet. (see "Set up a network").

- 1 Press .
- 2 Select [**Internet Services**] and press **OK**.
↳ The Internet services are displayed.
- 3 Select a service.
 - [**Facebook**]: a social networking service
 - [**AccuWeather**]: an online weather forecasting service worldwide
 - [**YouTube**]: a video-sharing service
 - [**Piccasa**]: an online photo album
- 1 Follow the on-screen instruction and use your remote control to enjoy the services.

Function	Button/Action
Select a service or item.	
Confirm a selection.	OK
Return to a previous page, or delete input text.	
Return to the home page.	

8 Settings

You can change settings of this player in the setup menu.

- 1 Press **Home**.
- 2 Select **[Setup]** and press **OK** to confirm.
 - ↳ The setup menu is displayed.
 - Press **▲** / **▼** to select a menu item or setting option.
 - Press **OK** to access the lower-level menu.
 - Press **↶** to return to the upper-level menu.

System

[Menu Language]: Select a language for on-screen menu.

[Subtitle]: Select a subtitle language for video.

[Screen Saver]: Enable the screen saver in case of inactivity (for example, in pause or stop mode).

[DLNA DMR]: Enable this player to play photos, music, and video files streamed from your computer.

[Device Name]: Change the name of this player.

[Auto Scan]: Scan media files on a storage device automatically.

[Scan Storage]: Start or stop scanning media files on a storage device.

[Resume Play]: Resume playback of a video file from the point where you last stopped.

[Factory Default]: Reset all settings to factory default.

Audio

[Night Mode]: Equalize loud sound and soft sound. If enabled, you can watch movies at a low volume at night.

[HDMI Output]: Select an output sound format when connecting the HDMI jack.

[SPDIF Output]: Select an output sound format when connecting the digital audio jack.

[Lip Sync]: Enable this function to synchronize audio to video playback.

Video

[Aspect Ratio]: Select display aspect ratio.

[TV System]: Select a video resolution setting that best is supported by your TV. See your TV manual for details.

Note

- If a selected video resolution is not supported with your TV and a blank screen appears, to recover picture display, wait for 10 seconds.
- For a composite (CVBS) connection, if no video output is made when you set the video resolution is to an HD resolution (1080p, 1080i, 720p), connect this player to the TV with an HDMI connection to play HD videos.

[Video Zoom]: Zoom in or out video scenes.

[1080P 24Hz]: Use 1080p 24Hz video output mode for video content.

Note

- The video resolution and the frame rate of the video content is 1080p 24Hz.
- Your TV supports the 1080p 24Hz.
- Ensure that you use an HDMI cable to connect this player to your TV.

[Deep Color]: Display colors with more shades and hues when the video content is recorded in Deep Color mode and the TV supports this feature.

[Video Setting]: Adjust the video settings.

Wireless network setup

[Ethernet]: Configure the IP address of this player.

[Wireless]: Set up a wireless network connection.

[Network Info]: Display the current network status.

MISC

[Version Info]: Display the information about software version of this player.

[DivX® VOD Code]: Display the DivX® registration code and deregistration code.

[Online upgrade]: Select to update software from a network.

[USB upgrade]: Select to update software from USB storage device.

9 EasyLink

This player supports Philips EasyLink which uses the HDMI CEC (Consumer Electronics Control) protocol. You can use a single remote control to control EasyLink compliant devices that are connected through HDMI.

- 1 Connect the HDMI CEC compliant devices through HDMI, and turn on the HDMI CEC operations on the TV and other connected devices (see the user manual of the TV or other devices for details).
- 2 Press **▲**.
- 3 Select **[Setup] > [Easy Link]**.
- 4 Select **[On]** under the options:
 - **[Easy Link] > [On]**
 - **[One Touch Play] > [On]**
 - **[One Touch Standby] > [On]**

↳ EasyLink function is turned on.

One Touch Play

When you play a file with this player, the connected HDMI CEC TV automatically switches to the HDMI input channel.

One Touch Standby

When you switch a connected device (for example TV) to the standby mode with its own remote control, this player switches to the standby mode automatically.

Auto Power On From TV

When you switch a connected device (for example TV) to this player port with its own remote control and this player is standby mode, this player switches to the power on mode automatically.

Note

- WOXX Innovations does not guarantee 100% interoperability with all HDMI CEC devices.

10 Update software

Before you update the software of this player, check the current software version:

- 1 Press **▲**.
- 2 Select **[Setup] > [MISC] > [Version Info.]**, and press **OK**.

Update software via the Internet

- 1 Connect the player to the Internet (see "Set up a network").
- 2 Press **▲**, and select **[Setup]**.
- 3 Select **[MISC] > [Online upgrade]**.
↳ If an upgrade media is detected, you are prompted to start the update.
- 4 Follow the instructions on the TV screen to update the software.
↳ When the update is complete, this player automatically turns off and on again.

Update software via USB/SD

- 1 Check the latest software version on www.philips.com/support.
 - Search for your model and click on "Software and drivers".
- 2 Download the software to the root directory of a USB storage device.
- 3 Connect the USB storage device to the  (USB) connector on this player.
- 4 Press **▲**.
- 5 Select **[Setup] > [MISC] > [USB upgrade]**.
↳ If an upgrade media is detected, you are prompted to start the update.
- 6 Follow the instructions on the TV screen to update the software.
↳ When the update is complete, this player automatically turns off and on again.

Caution

- Do not turn off the power or remove the USB storage device when the software update is in progress because you might damage this player.

11 Troubleshooting

If you contact Philips, you will be asked for the model and serial number of this player. The model number and serial number are at the bottom of this player. Write the numbers here:

Model No. _____

Serial No. _____

No picture.

- Refer to the TV user manual for how to select the correct video input channel

No sound output from the TV.

- Make sure that the audio cables are connected to the audio input sockets that are grouped with the selected video input sockets.

The contents of the USB storage device cannot be read.

- The format of this USB storage device is not supported.
- The supported memory size is 1TB maximum.
- Make sure that this player supports these files. (Refer to "**Specifications**" > "**File**")
- DRM-protected video files that are stored on a USB/SD storage device cannot be played through an analog video connection (for example, composite). You need to use an HDMI connection to play these files.

Subtitles are not displayed or not properly displayed.

- Make sure that the player supports the formats of the subtitles. (Refer to "**Specifications**" > "**Subtitle support**")
- To use a separate subtitle file for DivX video play, do the following:
 - ① **Name the subtitle file in the same way as you do with the DivX video file, with file extension names unchanged.**
 - ② **Save the subtitle file under the same directory as the DivX video file on the mass storage device.**
 - ③ **Through the player, play the DivX video from a mass storage device.**
- If you stream DivX video files through DLNA, the separate subtitle files are not supported.

12 Specification
