# Highlights

## CinemaPerfect Quad Full HD

Philips' new CinemaPerfect HD engine offers quad full HD for better video playback than ever. The intelligent engine sharpens and reduces noise that is produced when video is compressed into MPEG format. Together with improved upscale processing, the engine produces sharp and deep images on screen.

## Integrated HDMI Hub

The HDMI Hub gives you the ease of connecting all your devices to the TV without too many wires. It provides you the convenience of enjoying the best possible sound quality while watching different contents on your flat TV. You can connect all your HDMI devices directly into the home theater system's HDMI hub and using only one cable to connect to your flat TV. With this setup, you can easily enjoy your movies or TV programs in HD picture and sound and not have to deal with messy wires!

## Bluetooth

Bluetooth is a short range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favorite music from any smartphone, tablet or laptop, including the iPod or iPhone with a Bluetooth-enabled speaker.

## Titanium tweeters

The co-developed tweeters, crafted in titanium, are very rigid and light to guarantee undistorted sound. Their incredible resistance to distortion and resonance through the whole audible frequency range guarantees superb clarity of all sound details.

## Premium Class D Amplifiers

The Philips proprietary Premium Class-D Amplifiers are designed to preserve the original sound source for greater audio signal accuracy, thus allowing acoustic details in

music and movies to be delivered exactly as the artist or director intended.

## Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

## Exposed tweeter

Unique speakers designed with exposed tweeters to give maximum dispersion and openness in the sound.
