- Frequency band: 2.4000-2.4835 MHz

Highlights

Large, bright color display

Colours make your phone easier to use. The menus are easily read and icons are easily identified.

Speakerphone - Talk handsfree

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

100-name phonebook

Always have the phone numbers of your loved ones available: Save up to 100 names in your phonebook.

Loud and clear sound

Loud and clear sound

10 hours talk time

An extra large, rechargeable battery provides an extra-long 10 hours of talk time. Longer talk times decrease the risk of your calls being cut short because of low batteries. Actual talk times may vary depending on usage situations.
