# Highlights

## Digital answering machine

With a digital answering machine, you'll never miss a call or message.

## 15-minute recording time

Records up to 15 minutes of incoming messages

## Illuminated message-counter

Just look at the base station to instantly know whether you have received any messages.

## Caller name & number display

The name of the person or company calling is shown on the telephone display. The names of first-time callers can be displayed as well as those that are programmed into the telephone beforehand.

## Backlit display & keypad

Backlit display & keypad ensures easy viewing and operation in low light conditions

## Ergonomic Design

The smooth rounded shaped handset fits perfectly in your hand for natural, balanced operation. It looks great too!

## Virtually interference free

Thanks to an advanced digital technology, calls are undisturbed by interferences from other devices.

## Speakerphone - Talk handsfree

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

## Polyphonic ringtones

A polyphonic ringtone means that the phone can play many tones simultaneously, so that an accurate musical performance is possible, and when played through the phone's speaker these polyphonic ringtones sound like real music.
