# Highlights

## Protective silicone

This case is made out of soft silicone which adds a layer of grip to your player, while it also protects your device against normal wear and tear.

## Wrap-around protection

The material of this case wraps around from back to front, providing protection for the corners and perimeter of your device's face.

## Internal channels absorb shock

For even better protection, the shock-absorbing material also features internal channels that distribute the shock within the case instead of transferring to your device.

## Raised grip works both ways

From reading to gaming, this case is especially designed to improve your grip whether you're using your device in portrait mode or landscape mode.
