- Charge your second mobile device via USB

Easy to use

- Smartly designed FlexiDock to fit/charge Android phone
- Discover, share music & more features via DockStudio app
- Songbird to discover, play, sync music between PC & Android

PHILIPS
sense and simplicity

Highlights

FlexiDock

The Philips FlexiDock is perfect for Android powered phones. Its unique design cleverly docks most Android powered phones - whether the phone's connection socket is at the bottom, on the side or even on the top. This extreme flexibility is the first of its kind, catering to Android powered phones that are made by different manufacturers with no standardized position and orientation for the micro USB connection socket. The dock is also adjustable to hold the phone in both portrait and landscape positions, letting you position your Android powered phone at the centre of the speaker.

Bluetooth music streaming

Listen to all your favorite songs on a speaker that delivers fabulous sound. This Philips docking speaker plays music from your Android powered devices via Bluetooth. Simply download the free Philips DockStudio app and the Bluetooth will automatically be turned on and connect once when your device is docked. You get to enjoy powerful and outstanding sound, with unbeatable convenience. Hardly anything else sounds as good.

Charge two mobile devices

Charge your second mobile device via USB

Battery or AC powered

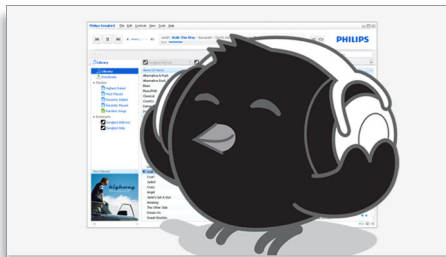

Battery or AC power option for music enjoyment anywhere

DockStudio app for Android

The free Philips DockStudio app brings a myriad of unique features to your docking speakers. You can listen to thousands of Internet radio stations worldwide, browse your music collection and share what you are listening to with friends via Facebook, or photos of the artist on Flickr. The app comes with Songbird music function, so you can discover, play and sync media seamlessly between PC and Android powered devices. In Clock mode, the app lets you set multiple customized music alarms and gives updated weather reports. Completely free, the app can be downloaded from Google play.

Songbird music network

Songbird is a simple, easy-to-use PC program and Android app. It lets you discover and play all your media, and sync it seamlessly with your PC. Its intuitive and powerful music management features let you discover new artists and music styles directly in the program through music and media stores, services and websites. Play your own library and media from the Internet and seamlessly sync all of it from your PC to your Android devices.
