Green Specifications

- Green Flagship

Highlights

Free intercom

No need to stop what you are doing and go to give the handset to your son when his friend calls: you can freely and easily call the handset in his bedroom and transfer the call.

Ringtone download

This function offers the possibility to personalize your phone by downloading ringtones. Simply call the dedicated service provider and select your favourite song. An SMS is sent to you, together with the attached melody. You can select this melody as any other ringtones (country and network dependent).

VIP function

Identify who's calling by the ringtone! The VIP icons and melodies indicate to which group in the phonebook the caller belongs. Phonebook entries can be divided in different VIP groups for which you can allocate a specific ringtone.

Full graphic display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

300-hours standby autonomy

Leave your handset off the base for more than 12 days without the need to recharge it. This contributes to make a very environment friendly device.

Handsfree on Handset

The handsfree speaker phone lets you hold a conversation while your hands are busy with something else and wherever you are. With both the speaker and the microphone in front of the handset, it is just like talking face to face with your correspondent.
