PHILIPS

Highlights

Wireless stream music & photos

Your PC/ MAC is filled with music that you can now conveniently stream onto your Philips audio device – without messy cables. Share your favorite songs with others at a party, or simply enjoy them at the comfort of your home. Do the same for your photo collections, and view them at leisure while you listen to music. Unlock your PC/ MAC treasures with the convenience of wireless streaming.

Napster online music library*

Get all the music you ever want with Napster - an online music service that offers you over 10 million tracks from 790,000 artists, 980,000 albums and all genres. Access to Napster is made effortless with the Philips micro system, thanks to the icon-based LCD display panel,

and gives you all the music you want - quickly and easily. With just a few clicks, Napster's vast library is freed from your PC or MAC, and streamed wirelessly for you to enjoy on the Philips system. Change the way you listen to music now.

Internet radio stations

Streamium comes with thousands of Internet radio stations. Now you can stay abreast of all kind of music worldwide. Connect your Streamium to the Internet and listen to your favorite online programs without having to turn on your PC/MAC.

FullSound

Philips' innovative FullSound technology faithfully restores sonic details to compressed

music, dramatically enriching and enhancing it, so you can experience music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed music in true-to-life sound that will touch your soul and move your feet.

MyRemote app

The Philips MyRemote app lets you use your iPhone, iPod Touch or Android Smartphone as a remote to control your Philips networked AV products. The app automatically recognizes your Philips Blu-ray player, Home theater or Streamium audio system connected to your home Wi-Fi network, and gives you instant control over the devices from anywhere in your home. And if you have more than one Philips networked AV product, the app will allow you to switch between them and control each one independently. This free app is created exclusively by Philips.
