- Charging time: 14 hours hr
- Kind of Battery: Rechargeable
- Number of batteries: 2
- Radio RF power: <250mW
- Standby time: 200 hours
- Talk time: up to 15 hours
- Power supply base station: 230V

Highlights

Text messaging (SMS)

The Short Message Service (SMS) is a mechanism for delivery of short messages which can have up to 160 characters of text. These 160 characters are plain text in nature and can be comprised of words, numbers or an alphanumeric combination. The Eaton@LetterWise predictive text editor helps you to write text messages more quickly. With its unique SMS system you can receive up to 200 messages in 10 different mailboxes. Greeting to a loved one, a quick reminder about an important meeting, ...all this can now be put in a SMS and sent over the fixed network.

Direct SMS key

No need to go through various menus when writing or reading SMS. The direct SMS key makes messaging more convenient and even faster.

Full graphic display

This type of displays makes it easier to use your phone, thanks to the good quality and legibility of the characters. It also gives you more freedom in communication from your home. Now you can combine text with images or numbers, when sending an SMS for example.

Pilot key & carousel menu

The pilot key navigation system allows easy navigation and settings. The pilot key is a roller on the left side of the phone that can be scrolled up and down and pressed in the middle. It commands the Carousel menu which is a circular loop of menu icons displayed on the screen.

Clock alarm timer

Clock alarm timer

Instrumental ringtones

Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.
