

Cordless phone

- 4.6cm display/ white backlight
- Handset speakerphone

D4601B/90

## Smart Elegance

With a large reverse display, extended privacy settings, micro USB charging and stylish contours, the Philips D465 Cordless Phone with inbuilt answering machine offers superior sound in a sleek form. Enjoy every call in crystal clarity.

### Benefits

#### As convenient as it should be

- High contrast, 4.6cm (1.8") white on black graphical display
- Caller ID – so you always know who is calling\*
- Up to 16 hours of talk time on a single charge
- Stay connected during power cuts via micro-USB power bank
- Black list, anonymous call, silence mode, call barring
- Keypad backlight for fast access even in dark room
- Three-field entries for assigning 3 numbers to one contact

#### Exceptional sound

- Freestanding handset with a speaker for easy handsfree calls
- HQ-Sound: high quality acoustic engineering for superb sound
- MySound profiles to match your sound preference

#### Eco-conscious product

- Low radiation and power consumption

**PHILIPS**

## Features

### 4.6cm (1.8") graphical display

### Caller ID\*

Sometimes it is good to know who is calling before you answer. And our Caller ID lets you keep track of who is on the other end of the line.

### Eco-conscious product

Philips phones are energy efficient and designed to be respectful to the environment.

### Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

### HQ-Sound

Philips cordless phones with HQ-Sound: build upon decades of experience and breakthrough innovations in developing Hi-Fi audio products and high-end headphones to deliver excellent voice clarity on our DECT phones. When it comes to improving sound quality, our acoustics engineers and architects have thought of everything – high quality components, digital signal processing, precise acoustic design, advanced testing and fine-tuning. The result is sound that is crisp, clear and authentic. Sound so good and natural, it is almost like being there in person.

### MySound profiles

Sound perception is subjective, and everyone has their own listening preference. MySound brings personality back to every conversation by allowing you to choose the audio profile that best matches your sound preferences: Clear – to make voices sound crisper and clearer; Soft – for friendly, softer tones; Warm – to make voices sound welcoming and warm.

### Up to 16 hours talk time

### Micro-USB connector

The integrated micro-USB connector socket on the base unit ensures that the phone can stay powered via a pre-charged power bank, allowing you to make calls even if the power cuts out. The power bank charging feature supports most power bank products with which are able to provide a minimum output current below 85mA without automatic shutdown. Power bank sold separately.

### Extended privacy settings

Black list restricts receiving calls from specific numbers or starting with certain digits, keeping you away from unwanted calls. You can block 4 sets of numbers. Anonymous call restricts incoming calls with hidden numbers, sometimes used by the telemarketers. The phone will also not ring such that you are not disturbed. With silence mode you can disable the ringtones for specific times to enjoy peace and silence. Thanks to Call barring you can avoid expensive phone bill surprises by blocking calls to specific numbers starting with certain digits (for example pay per call numbers).

### Keypad backlight

The soft amber backlight makes keys easy to read in low light conditions and at night.

### Three-field phonebook entries

These days most people have multiple contact numbers. Our contact list makes it easier for you to manage your phone contacts. Simply save three

phone numbers for up to 100 contacts with a choice of three different field names for home, work or mobile.
