Enjoy your music from multiple sources

- Play CD, CD-R and CD-RW
- FM/MW tuner for radio enjoyment

Rich and clear sound

- Dynamic Bass Boost for deep and dramatic sound

PHILIPS

Highlights

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

CD Shuffle/Repeat

The "Shuffle/Repeat" function helps you to get rid of the boredom of hearing your music played in the same order all the time. After loading your favorite songs to the player, all you have to do is to select one of the modes - "Shuffle" or "Repeat" for your tunes to be played in different modes order. Enjoy the different and unique music experience every time you hook up to your player.

Play CD, CD-R and CD-RW

Philips is known for making products which are compatible with many discs available in the market. This audio system lets you enjoy music from CD, CD-R and CD-RW. CD-RW (CD-Rewritable Compatible) means that your audio system can play both CD-Recordable (CD-R) and CD-Rewritable (CD-RW) discs. CD-R discs are recordable once and can be played on any audio CD player while CD-RW discs can be recorded and rewritten multiple times and can only be played back on compatible audio CD players.

FM/MW tuner

FM/MW (AM) stereo tuner

Line-in connection

MP3 line-in connectivity allows direct playback of MP3 content via your audio system. By simply connecting your portable MP3 player to the audio system via its built-in line-in jack, you can enjoy superb sound quality while playing your favorite music from your portable MP3 player.
