Obsessed with sound

Relax with great music

Good sound is yours to have with the Philips classic micro music system. Playback your favorite MP3/WMA music using the USB Direct or MP3 link. Elegantly designed with wood-finished speakers for a classic look that won't go out of style.

Unlimited listening pleasure
- USB Direct for MP3/WMA music playback
- Play MP3/WMA-CD, CD and CD-RW
- MP3 Link for portable music playback

Enrich your sound experience
- Digital Sound Control for optimized music style settings
- Dynamic Bass Boost for deep and dramatic sound
- 2x15W RMS/2x30W music power

Easy to use
- Motorized CD loader for convenience access
- Wake up and sleep timer functions
- Radio Data System for station information and data services

PHILIPS

Highlights

USB Direct

With the USB Direct mode, simply plug in your USB device to the USB port on your Philips device and your digital music will be played directly from the Philips device.

Digital Sound Control

Digital Sound Control offers you a choice of pre-set Jazz, Rock, Pop and Classic controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

MP3 Link

The MP3 link connectivity allows direct playback of MP3 content from portable media players. Besides the benefit of enjoying your favorite music in the superior sound quality delivered by the audio system, the MP3 link is also extremely convenient as all you have to do is to plug your portable MP3 player to the audio system.

Radio Data System (RDS)

The Radio Data System (RDS) lets you tune into radio stations without having to remember the frequencies. In standard mode. RDS displays the station name instead of the transmission frequency, facilitating quick and easy tuning. RDS also allows stations to send text messages such as news and station information directly to the radio display. Commonly used in Europe, RDS text is sent out on the same frequency the radio station broadcasts on. You can choose either the basic RDS display (station name) or subscribe to additional text-based services.

Specifications

Sound
- Sound enhancement: digital sound control 4 modes, Dynamic Bass Boost
- Output power: 2 x 15 W RMS / 2 x 30 W music power
