

Philips
CD Soundmachine with
Dynamic Bass Boost

MP3

AZ1316

all-in-one, impressive MP3 music

Compact and stylish, this all-in-one CD player plays all CDs, including MP3-CD. Sit back and enjoy music convenience with its programmable 20 track replay.

Feature-packed CD player

- MP3-CD, CD-R/RW compatible
- CD shuffle/program/repeat

Impressive sound

- Dynamic Bass Boost for deep and dramatic sound
- Bass Reflex speakers deliver a powerful, deeper bass

Easy to use and precise control

- Digital tuning with presets
- Autostore Programming for one-touch radio tuning
- Handy remote control

PHILIPS
sense and simplicity

Highlights

MP3-CD, CD-R/RW compatible

MP3-CD, CD-R/RW compatible

CD shuffle/program/repeat

The "Shuffle/Program/Repeat" function helps you to get rid of the boredom of hearing your music played in the same order all the time. After loading your favorite songs to the player, all you have to do is to select one of the modes - "Shuffle", "Program" or "Repeat" for your tunes to be played in different modes order. Enjoy the different and unique music experience every time you hook up to your player.

Dynamic Bass Boost

Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high - at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost

bass levels, so you can enjoy consistent sound even when you turn down the volume.

Bass Reflex Speaker System

Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.

Digital tuning with presets

Digital tuning with presets

Autostore programming

Autostore Programming is a convenient feature that allows you to tune in to your favorite stations and set station presets by simply pressing a button. Autostore Programming does away with the hassle of manual radio station tuning and setting of presets. A built-in electrical circuit automatically scans local radio station frequencies, locks on to the strongest radio station signals, and assigns them to specific presets.
