- 300W RMS total output power

HD cinematic viewing experience

- Integrated HDMI Hub connects devices to the TV conveniently

PHILIPS

Highlights

300W RMS total output power

300W RMS total output power

Dolby Virtual Speaker

Dolby Virtual Speaker is a sophisticated audio virtualization technology that produces rich and immersive surround sound from a two-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. DVD playback is enhanced by expanding the 2-channel environment. When combined with Dolby Pro Logic II processing, any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

EasyLink

EasyLink lets you control multiple devices like DVD players, Blu-ray players, soundbar speaker, Home theater and TV's etc. with one remote. It uses HDMI CEC industry-standard protocol to share functionality between

devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

Flexible placement

Flexible placement on the wall or tabletop

MP3 Link

MP3 Link allows playback of MP3 files, directly from your portable media player, on your home theater system. Simply connect your portable MP3 player to the built-in MP3 Link jack and enjoy your MP3 music in the superior sound quality delivered by the Philips home theatre system. MP3 Link brings your portable music into the comfort of your living room.

SoundBar design

The SoundBar home cinema speaker lends an air of sophistication and grace to any living room. Though it is designed to fit a flat TV with a 81 cm (32") screen or larger, it will also sit

under any other flat TV like a companion - matching all your interior and your lifestyle.

Subwoofer for powerful bass

Subwoofer for powerful bass

USB Link

The Universal Serial Bus or USB is a protocol standard that is conveniently used to link PCs, peripherals and consumer electronic equipment. With USB Link, all you have to do is plug in your USB device, select the photo or music, and play away.

Integrated HDMI Hub

The HDMI Hub gives you the ease of connecting all your devices to the TV without too many wires. It provides you the convenience of enjoying the best possible sound quality while watching different contents on your flat TV. You can connect all your HDMI devices directly into the home theater system's HDMI hub and using only one cable to connect to your flat TV. With this setup, you can easily enjoy your movies or TV programs in HD picture and sound and not have to deal with messy wires!

Specifications
