

Quick Use Guide

FWD872/55

PHILIPS

Use this simple and quick way to watch your favourite DVD movie and enjoy your Home Cinema experience!

Helpful Hints

You only need to make one video connection to your TV in order to view the DVD playback.

If your TV has S-Video or Component (Pr Pb Y) video jacks, use one of these video connections instead for higher picture quality.

If your TV has only a single Antenna In jack, you will need an accessory RF modulator. The RF modulator converts the video from the DVD system so it can play through the TV's Antenna connector. Refer to your owner's manual for proper connection.

When listening to TV programs, press **TAPE/AUX** button on the remote to set the DVD system to AUX mode in order for the sound to be heard.

DEMO MODE

To turn ON

Press & HOLD  button for 5 seconds
