- Superior call quality. Every word is loud and clear
- Timeless Fidelio design

PHILIPS

Over-ear wireless headphones

Exquisite natural sound Noise Cancelling Pro+, Superior call quality, Timeless Fidelio design

Highlights

Philips sound signature

From the taut, controlled bass to the warm mids and sparkling highs, these superb headphones bring you exquisite natural sound with precise instrument separation. Graphene-coated dynamic drivers paint more detail than ever. You'll hear the tracks your favourite artists made—just the way they made them.

Noise Cancelling Pro+

Adaptive noise cancelling quickly adjusts to your environment to suppress outside noise, including wind, in real time. Music to calls, you can immerse yourself wherever you are without lifting a finger. If you do want to adjust the level of transparency or wind-noise reduction, simply use the Philips Headphones app.

Superior call quality

Beamforming mics focus on the sound of your voice while advanced AI algorithms stop background noise from ruining the call. You can happily make calls from the busiest,

noisiest locations: the person you're talking to will hear you clearly, and you'll hear them.

Timeless Fidelio design

Elegant. Assured. Supremely wearable. Whether it's the rounded headband, with dark satin aluminium ear-cup rings and Muirhead leather accents. Or the way these over-ear headphones feel: smaller and lighter, with cushioned memory-foam ear cups that exert a gentle, even pressure on the side of your head.

Next-generation Bluetooth

These headphones will work with devices that support Bluetooth LE Audio and the LC3 codec. You'll get noticeably better sound and a steadier connection that doesn't dip in built-up areas. There's virtually no lag for films or gaming, and you're all set for shared listening over wireless networks with Auracast broadcasting.*

L4/00

Superb sound from any source

These headphones give you choices. For the best sound when streaming on iOS or Android devices, AAC, LDAC and LC3 codecs are all supported. For wired listening, the detachable cable (included) lets you plug into a DAC, headphone amp or laptop. You can also use a USB-C cable to plug into any phone with a USB-C port.

40 hours play time (with NC)

You get well over a day of listening even if you have noise cancellation turned on. A full charge takes just 2 hours via USB-C, and a quick 15 minute charge gives you an extra 14 hours. When you're not listening, these headphones fold flat to fit in their storage case.

Seamless control

There are touch controls and buttons on the ear cups, and the music pauses if you take the headphones off. Advanced Bluetooth multipoint lets you seamlessly switch back and forth between two devices: listen to music on your laptop, take a call on your phone, and go back to your music automatically.

Specifications

Sound

- Frequency range: 7 - 40,000 Hz
- Speaker diameter: 40 mm
- Impedance: 16 Ohm
- Maximum power input: 30 mW
- Sensitivity: 99 dB (1 KHz -10 dBFs)
- Driver type: Graphene coated
- Hi-Res Audio

Connectivity
