PHILIPS

Highlights

DVD, DVD+/-R, DVD+/-RW, (S)VCD

The Philips player is compatible with most DVD and CD discs available on the market. DVD+/-R can accept both of the common recordable DVD formats. Likewise, DVD+/-RW handles both common rewritable disc types. The quality of a SVCD (Super VideoCD) offers a much sharper picture than a VCD because of the higher resolution. MPEG4 is designed to deliver DVD-quality video (MPEG-2) at lower data rates and with smaller file sizes.

Play MP3/WMA-CD, CD and CD-RW

Audio compression technology allows large digital music files to be reduced up to 10 times in size without radically degrading their audio quality. MP3 or WMA are two of the compression formats that let you enjoy a world of digital music on your Philips player. Download MP3 or WMA songs from authorised music sites on the Internet or create your own MP3 or WMA music files by ripping your audio CDs and transferring them onto your player.

Up to 2 hrs movies playback

This Philips player comes with a compact built-in rechargeable battery for long-lasting power. Up to 2 hours of continuous film, photo and music playback enjoyment can be achieved on a single charge. Just plug in the power cable to recharge the player — it's that simple.

USB and SD card slots

Thanks to the complete file transferability, you can easily enjoy the convenience and fun of accessing more music and photos via the USB and SD card slots.
