- Others: Quick start guide, User Manual

Dimensions

- Main unit depth: 79 mm
- Main unit height: 137 mm
- Main unit width: 210 mm
- Packaging depth: 106 mm
- Packaging height: 156 mm
- Packaging width: 276 mm
- Gross weight: 1.03 kg
- Weight: 0.78 kg

DIGITALRADIO

AE5430/10

Highlights

DAB

DAB (Digital Audio Broadcasting) digital radio is a new way of broadcasting radio, in addition to FM analogue transmission, via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear and crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no retuning on the move.

DAB and FM compatible

DAB (Digital Audio Broadcasting) digital radio is a new way of broadcasting radio, in addition to FM analogue transmission, via a network of terrestrial transmitters. It provides listeners with more choices and information delivered in clear, crackle-free sound quality. The technology allows the receiver to lock on to the strongest signal it can find. With DAB digital stations there are no frequencies to remember, and sets are tuned by station name, so there is no retuning on the move.

Large backlit LCD display

Backlit LCD display ensures easy viewing and operation in low light conditions, and provides clear information at a glance.

Battery operation

The Philips clock radio operates on two AA batteries for optimum portability and positioning.
