Save Energy

- Low power consumption: < 0.65 W in stand-by mode

Highlights

All calls from your home phone

You can now make and receive landline and mobile phone calls from your home phone. This product can connect up to two mobile phones to your home phone via Bluetooth connection for ultimate convenience. You can also synchronize your mobile phonebook to landline phone and to your computer.

MySound

Sound perception is subjective and everyone has their individual listening preference, therefore MySound provides you with three distinctly different profiles in your choice of sound to give you the ultimate listening experience: Clear - for making the

voices very crisp and clear Soft - for a more friendly and soft voice Warm - for making the voice sound welcoming and warm.

Handset speakerphone

Handsfree mode uses a built-in loud speaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Low power consumption: < 0.65 W

Philips phones are energy efficient and are designed to be respectful to the environment. Now the power consumed in stand-by mode is less than < 0.65 W.
