

Philips
Weather Clock Radio

Indoor/outdoor temperature

AJ260

Weather information at your fingertips

Start your day right - every day. The compact Philips weather clock radio features a radio controlled clock and graphical weather forecast icons with multi-color light indicators. Your trusty weather forecaster keeping you punctual- always.

Stylish design with all the functions you need

- Display weather forecast with graphical animations
- Multi-color light weather indicator
- Temperature display for both indoor and outdoor temperature
- Built-in hygrometer displays indoor humidity
- Digital tuning with preset stations for extra convenience

Start the day your way

- Wake up to your favorite radio tune or a buzzer
- Gentle wake for a pleasant wake up experience
- Dual alarm time

Keep you punctual - always

- Large backlit LCD display for easy viewing in low light
- Digital radio-controlled clock for accurate time settings

PHILIPS
sense and simplicity

Highlights

Display weather forecast

Display weather forecast with graphical animations

Multi-color light indicator

This cool multi-color weather indicator lights up in a range of colors depending on the weather conditions. From orange on sunny days, blue on cloudy days to purple on rainy days, you can tell what the weather is like even if you are a distance away from the clock radio.

Temperature display

Weather information at your fingertips. The Philips Clock radio gives you the most current temperature available. Its smart temperature sensor displays outdoor temperature anytime.

Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

Large backlit LCD display

Backlit LCD display ensures easy viewing and operation in low light conditions, and provides clear information at a glance.

Radio-controlled clock

Radio-controlled clock automatically synchronizes with the local radio broadcast's standard time so you don't ever need to worry about checking for accuracy or making adjustments. Accurate time without latency is ensured daily or while the clock's power is on. Rest assured you'll always be punctual for every appointment!
