HTL7180

Cinematic surround sound, wirelessly

with detachable speakers

HTL7180 is Philips' first soundbar with real surround sound from wireless detachable speakers. Enjoy the freedom of casual and temporary placement of the surround speakers only when you need.

Designed to enhance your living space

- Minimalistic chic design to suit a modern decor
- Orientation sensor ensures the best sound in any placement

Connect and enjoy all your entertainment

- Connect to HDMI x 2 for great picture and sound quality
- Wireless music streaming via Bluetooth

Richer sound for watching TV and movies

- Surround on Demand - detachable wireless surround speakers
- Virtual Surround Sound for a realistic movie experience
- Dolby Digital and Pro Logic II surround sound
- Wireless subwoofer for clutter free placement

PHILIPS
Fidelio

Highlights

HDMI x 2

Enjoy larger-than-life 3D playback and crystal-clear 5.1 or 7.1 audio by simply plugging our player's audio HDMI x 2 output to the connection in your non-3D AV receiver.

Minimalistic chic design

Minimalistic chic design to suit a modern decor

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

Bluetooth

Bluetooth is a short range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favorite music from any smartphone, tablet or laptop, including the iPod or iPhone with a Bluetooth-enabled speaker.

Dolby Digital and Pro Logic II

A built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

Orientation sensor

The quality of your sound experience is determined by how the soundbar is positioned in a room. Luckily, this system comes with a smart auto-orientation sensor that instantly optimizes audio quality once it detects whether your soundbar is placed horizontally or vertically. So, whether you choose to sit your soundbar on a shelf or mount it on a wall, you can be sure you'll always have a superb audio experience.

Surround on Demand

Submerge your senses in superb surround sound whenever you want it. Simply detach the wireless surround speakers from the main Soundbar unit and place them at the rear of the room to get the full 5.1 surround sound experience with your games and movies. When the action is over, reattach the speakers to use your stylish Soundbar for music and TV shows. Using proprietary wireless audio technology and with surround speakers that operate on a unique frequency, there is no network interference. The result is a completely wireless surround system with lossless audio quality for both music and movies

Wireless subwoofer

Wireless subwoofer for clutter free placement

Specifications

Sound

- Sound Enhancement: Double Bass Sound, Night Mode, Treble and Bass Control
- Sound System: Dolby Digital 5.1, DTS Digital Surround
