- Mains power: AC 220-240 V - 50 Hz
- Number of batteries: 1 battery pack per handset
- Standby time: Up to 130 hours
- Talk time: Up to 10 hours

Highlights

Speakerphone - Talk hands-free

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or take notes during a call.

Very low energy consumption

Thanks to a high efficiency power supply, the overall energy consumption is reduced by more than 50% compared to a conventional power supply.

Automatic power reduction

Thanks to an intelligent embedded system, the transmitted power is permanently controlled and optimised depending on the distance between handset and base unit.
