Kiire ja kerge seadistamine:  
[www.philips.com/urc](http://www.philips.com/urc)

## 2 KAUGJUHTIMISPULDI HÄALESTAMINE

### Kaugjuhtimispuldi seadistamine

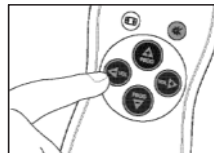

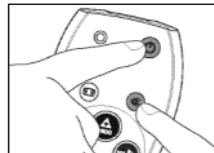

See on vajalik ainult juhul, kui teie poolt valitud seade ei vasta SRU 1010 klahvivajutustele. See võib nii juhtuda, kui SRU 1010 ei tuvasta teie televiisori tootjat ja/või tootemudelit. Sel juhul peate te kaugjuhtimispuldi vastavalt programmeerima.

Allpool kirjeldatud näide aitab teil kaugjuhtimispuldi seadistada.

Kaugjuhtimispuldi on võimalik seadistada nii käsitsi kui ka automaatselt.

### Kaugjuhtimispuldi seadistamine käsitsi

- Lülitage televiisor sisse (käsitsi või kaugjuhtimispuldi abil). Häälstage see esimesele kanalile.
- Kontrollige oma televiisori tootja firma selle kasutusjuhendi lõpus toodud kooditabelist. Ära on toodud üks või mitu viiekohalist koodi. Kasutage esimest koodi.  
Meie koduleheküljel [www.philips.com/urc](http://www.philips.com/urc) võite kohe sisestada oma seadme tootenumbri ja leida õige koodi.  
Valige koodid õigest tabelist.
- Hoidke SRU 1010 klahve  ja  korraga all 5 sekundi jooksul, kuni televiisori märgutuli jääb põlema.
- Sisestage punktis 2 leitud kood numbriklahvide abil.
  - Televiisori märgutuluke vilgub kaks korda ja jääb põlema. Sisestatud kood salvestati SRU 1010 mälus. Kui märgutuluke vilgub pikema aja jooksul ainult üks kord, ei ole sisestatud kood õige. Alustage uuesti punktist 2.
- Suunake kaugjuhtimispult SRU 1010 televiisori suunas ja proovige, kas see vastab klahvivajutustele õigesti.
  - Kui televiisor reageerib kaugjuhtimispuldi klahvivajutustele ootuspäraselt, on SRU 1010 kasutamiseks valmis. Ärge unustage koodi üles märkimast.
  - Kui televiisor ei reageeri kaugjuhtimispuldi klahvivajutustele üldse või reageerib vaid osadele vajutustele, alustage uuesti punktist 2 ning proovige mõnda muud koodi.**
