Highlights

40 dB EMI/RFI noise filtration
Built-in filtering technology ensures the best performance from your components. It guards against signal interference and loss of data. The higher the dB rating the better the noise reduction.

Protection indicator light
This LED alert lights up to indicate the surge protector is working properly.

Coax line protection
Connectors route the coaxial signal through the surge protector to protect against surges and spikes.

Power blocker
This automatic shutdown technology senses when the device has reached capacity and automatically shuts down electricity to your equipment. It protects against subsequent surges, even if you are not present

£100,000 equipment warranty
Protects your connected equipment for the life of the product.
