Alarm Clock radio for  
iPod/iPhone

with Lightning connector  
for iPod/iPhone  
FM, dual alarm  
4W

AJ5305D

## Wake up to great sound from your iPod/iPhone

Start your day with Philips clock radio & docking station. The free Philips App offers better waking and radio experiences, while the set's 4WRMS power delivers powerfully clear sound. Simply dock iPod/iPhone, even while it is in its case.

### Enrich your sound experience

- 4W RMS total output power
- FM digital tuning with presets
- Fast charging and play music via Lightning connector

### Easy to use

- Free HomeStudio app for enhanced wake-up & radio experiences
- Adjustable display brightness for comfort viewing
- Auto sync time via iPod/iPhone dock with Lightning connector
- Audio-in for easy portable music playback

### Start the day your way

- Rise to radio or iPod/iPhone music via Lightning connector
- Dual alarm to wake you and your partner at different times
- Gentle wake for a pleasant wake up experience
- Sleep timer for easy falling asleep to your favorite music

# PHILIPS

# Highlights

## Free HomeStudio app

There's no better way to wake up or listen to the radio than with the free Philips HomeStudio app. Simply download the app from the Apple App Store to enjoy a host of exciting features. Advanced alarm set up, for example, gives you greater flexibility in alarm settings - including alarm volume, duration, date and sound. You also get better user interface when you listen to the radio, with easy-to-use station preset functions.

## 4W RMS total output power

RMS refers to Root Mean Square which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. Essentially, amplifiers are limited by the electrical energy they can amplify and loudspeakers by the electrical energy they can convert into sound energy, without distorting the audio signal. The higher the wattage, the better the sound power emitted by the speaker.

## FM digital tuning with presets

Digital FM radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the

station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

## Play and charge via Lightning

Enjoy your favorite music while charging your iPod/iPhone via the new Lightning connector! Just dock it directly on the speaker to play your hand-picked tunes in superb sound. It also charges your device quickly while playing, so you don't have to work about the battery running out.

## Auto sync time

Auto sync time via iPod/iPhone dock with Lightning connector

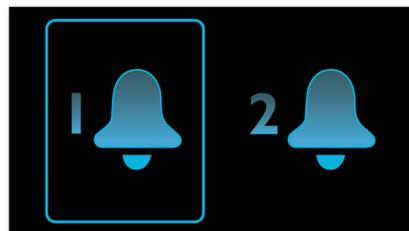

## Adjustable display brightness

Adjustable display brightness allows you to customize the display to your needs.

## Rise to radio or iPod/iPhone

Rise to radio or iPod/iPhone music via Lightning connector

## Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you

up and the other time to wake up your partner.

## Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

## Sleep timer

Sleep timer lets you decide how long you want to listen to music, or a radio station of your choice, before falling asleep. Simply set a time limit (up to 1hour) and choose a radio station to listen to while you drift off to sleep. The Philips radio set will continue to play for the selected duration and then automatically switch to a power-efficient and silent stand-by mode. Sleep Timer lets you fall asleep to your favourite radio DJ without counting sheep, or worrying about wasting power
