Blu-ray Disc player

BDP7200

## Defining the world of high definition

with Blu-ray disc playback

Enjoy the thrill of full high definition pictures delivered by the BDP7200. Indulge in every detail, silky smooth action and vivid colours with Deep Color. Current DVD favourites can also be enjoyed, with upscaling to 1080p via HDMI.

### See more

- Blu-ray Disc playback for sharp images in full HD 1080p
- Deep Color for vivid images in over a billion colours
- 1080p at 24 fps for cinema-like images
- Full HD 1080p for razor sharp images
- Bonus View with Picture-in-Picture for video and audio choices
- Flawless, undistorted video with MPEG and 3D noise reduction
- DVD video upscaling to 1080p via HDMI for near-HD images

### Hear more

- Dolby TrueHD and DTS-HD for high fidelity 7.1 surround sound

### Engage more

- Enjoy all your movies and music from CDs and DVDs
- EasyLink controls all EasyLink products with a single remote

**PHILIPS**  
sense and simplicity

# Highlights

## Blu-ray Disc playback

Blu-ray Discs have the capacity to carry high definition data, along with pictures in the 1920 x 1080 resolution that defines full high definition images. Scenes come to life as details leap at you, movements smoothen and images turn crystal clear. Blu-ray also delivers uncompressed surround sound — so your audio experience becomes unbelievably real. The high storage capacity of Blu-ray Discs also allows a host of interactive possibilities to be built in. Seamless navigation during playback and other exciting features such as pop-up menus bring a whole new dimension to home entertainment.

## Bonus View

With Bonus View, you can enjoy picture-in-picture with audio choices. A second, smaller window that runs a separate video sequence appears over the main picture. You can then choose whether you want to listen to what's going on in the smaller window or in the larger one. This allows you to enjoy many special features that are often included in Blu-ray Disc movies. For example, you can watch and listen to the director's comments in the smaller window whilst he points to scenes or actors in the main picture.

## Full HD 1080p

Blu-ray Discs have the capacity to carry high definition data, along with pictures in the 1920 x 1080 resolution that defines full high definition images. This can only mean you get the best possible TV picture quality available today — so prepare to feast your eyes.

## Deep Color

The real world is not limited by colours — practically any hue can occur in any shade, in any luminosity. What you see on your TV screen is a different matter, so images often don't look true to life. Deep Color recreates the natural world on your TV screen, bringing to you the millions and millions of colours that occur in reality — and taking your viewing experience to new heights.

## 1080p at 24 fps

Bring a true cinema experience into your living room, with 24 frames-per-second video. Original films are all recorded at this frame

rate, providing an ambience and image texture that is so unique. Philips Blu-ray Disc players are equipped to bring you 24fps directly from Blu-ray Discs — giving you sensational cinema-like high definition images that will astound you.

## EasyLink

EasyLink lets you control multiple devices with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC-enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

## Flawless, undistorted video

Cameras taking still and moving images pick up aberrations (or noise) from a variety of sources. These, though not individually visible, contribute to poor picture quality. The MPEG and 3D noise reduction feature cleans the picture up — so you can be assured of crystal clear images every time.
