- One-Touch with NFC-enabled smartphones for Bluetooth pairing

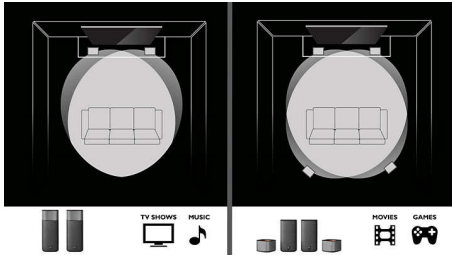

Richer sound for watching TV and movies

- Surround on Demand — detachable wireless surround speakers
- Premium soft dome tweeters for Crystal Clear Sound
- Dolby Digital and Pro Logic II surround sound

PHILIPS

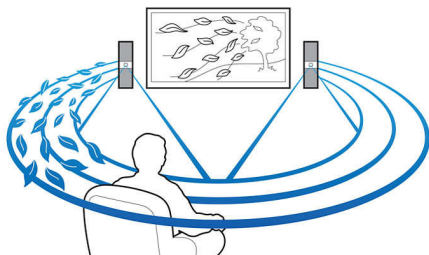

Highlights

Surround on Demand

Submerge your listening senses in superb surround sound whenever you want it. Simply detach the wireless surround speakers from the left and right main speaker units and place them at the rear of the room to get a multi-channel surround sound experience with your games and movies. When the action is over, reattach the speakers for music and TV shows. Using proprietary wireless audio technology with surround speakers that operate on a unique frequency, there is no network interference. The result is a completely wireless surround system with lossless audio quality for music and movies.

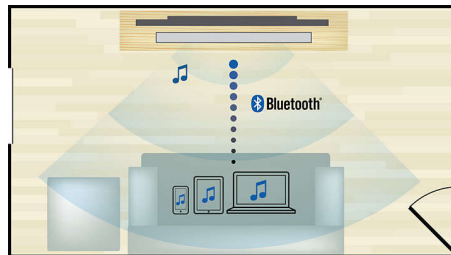

Premium soft dome tweeters

With Philips' Crystal Clear Sound, you will now be able to discern and appreciate every sound detail the way it's meant to be heard and

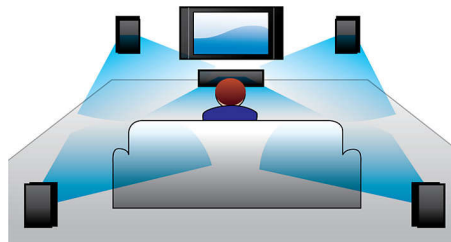

as the artist or director intended! Crystal Clear Sound reproduces the sound source—whether it's an action film, a musical or a live performance—faithfully, precisely and without any distortion. Philips home theatres with Crystal Clear Sound keep audio processing to a minimum, preserving the purity of the original audio content. The result is greater sonic accuracy delivered to your ears.

Bluetooth wireless streaming

Bluetooth wireless music streaming from your music devices

Dolby Digital and Pro Logic II

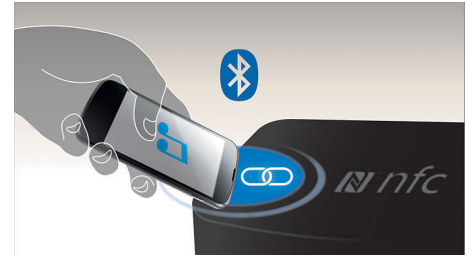

A built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and

dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

HDMI ARC

HDMI ARC to access all the sound from your TV

NFC technology

Pair Bluetooth devices easily with one-touch NFC (Near Field Communications) technology. Just tap the NFC-enabled smartphone or tablet on the NFC area of a speaker to turn the speaker on, start Bluetooth pairing and begin streaming music.

Wireless subwoofer
