

Philips  
Digital tuning clock radio

AJ5000

## Colour your day

with multi-colour mood lights

Make a style statement with an elegant bedside timepiece that offers you more than its looks. This clock automatically sets the right time when plugged in, and sets the right mood with multi-coloured mood lights, adding charm to your room.

### Designed to fit your bedroom

- Multi-colour mood-lights to match your style
- Mood-lights control for colour loop or desired ambience

### Start the day your way

- Wake up to a melody, radio or buzzer with mood-lights
- Digital tuning with preset stations for extra convenience
- Dual alarm to wake you and your partner at different times
- Gentle wake for a pleasant waking experience
- Repeat alarm for additional snooze

### Easy to use

- Plug and set the time automatically
- Time and alarm backup to wake up on time even with power cut
- Sleep timer helps you to drop off to your favourite music
- Adjustable display brightness for comfortable viewing

**PHILIPS**  
sense and simplicity

# Highlights

## Multi-colour mood-lights

Colour and light can affect how you feel. One combination can make you feel energised, and another make you feel composed. Coloured lights are also undeniably attractive and can add interest to any room. This clock radio comes with multi-colour mood-lights that can produce more than 32,000 colours — giving you a plethora of hues to choose from, whether you want light that matches your mood or your décor.

## Mood-lights colour control

Set the mood-lights to play a loop of the colours — and enjoy a vibrant ambience. Or pause the lights to stop at a colour you simply like, or a colour that matches your room or your mood.

## Wake up with mood-lights

Have a great start to each day with your choice of wake-up call. Have a buzzer or melody wake you—or opt for your favourite radio station to rouse you from slumber. Mood-lights can also come on when your alarm sounds, making mornings ever so pleasant. The mood-lights are also designed to change colours according

to how long you have snoozed after the alarm first went off. It stays green for the first ten minutes, then turns yellow for the next ten, and then becomes red to signal that you are going to be late.

## Plug and set

Take the clock out of its box, plug it in and the time is already set for you - automatically. The intelligent clock reads pre-programmed data and sets the correct time according to the default time zone. If you are living outside the default time zone, all you have to do is press the Time zone button and the clock will reset the time. No more reading manuals, no more fiddling with buttons.

## Time and alarm backup

When there is a power failure, this intelligent clock will still maintain its reliable time and your settings. The scheduled alarm remains active even when its display is off - all thanks to a pre-installed battery. When the power comes back on, there is no need to adjust the clock or reinstate settings. More amazingly, even if power supply is not restored, the battery provides enough energy for the buzzer to go off at the alarm time you have set - making sure you never wake up late.

## Digital tuning with presets

Simply tune into the station that you want to preset, then press and hold the preset button to memorise the frequency. With preset radio stations that can be stored, you can quickly access your favourite radio station without

having to manually tune the frequencies each time.

## Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

## Gentle wake

Start your day the right way by waking up gently to a gradually increasing alarm volume. Normal alarm sounds with a pre-set volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favourite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

# Specifications

## Convenience

- Alarms: 24-hour alarm reset, Buzzer Alarm, Gentle Wake, Radio Alarm, Repeat alarm (snooze), Sleep timer, Dual alarm time
- Clock/Version: Digital
- Display Type: 5 digit display
