Soundbar speaker

3.1 CH wireless subwoofer

Bluetooth® and NFC
HDMI ARC
200 W

HTL3160B

Unmatched voice clarity from 3.1 ch of sound with wireless subwoofer

Upgrade your TV with enhanced voice clarity and virtual surround sound for a better cinematic experience, plus wireless music streaming with one-touch NFC pairing.

Designed for simplicity

- Low-rise profile for the perfect fit in front of your TV
- Touch panel for intuitive playback and volume control

Richer sound for watching TV and movies

- Virtual Surround Sound for a realistic movie experience
- Dolby Digital and Pro Logic II surround sound
- Wireless subwoofer adds thrill to the action
- Dedicated centre-channel speaker for superior voice clarity

Connect and enjoy all your entertainment

- One-touch with NFC-enabled smartphones for Bluetooth pairing
- Wireless music streaming via Bluetooth
- Works with TVs, BD/DVD players, gaming consoles, MP3 players
- Audio-in to enjoy music from iPod/iPhone/MP3 player
- EasyLink to control all HDMI CEC devices via a single remote
- Enjoy MP3 music directly from your portable USB devices

PHILIPS

Highlights

Centre-channel speaker

A centre-channel speaker dedicated especially to voice frequencies anchor speech to the centre of the screen. This offers improved voice positioning and clarity, increasing immersion in movies.

Dolby Digital and Pro Logic II

A built-in Dolby Digital decoder eliminates the need for an external decoder by processing all six channels of audio information to provide a surround sound experience and an astoundingly natural sense of ambience and dynamic realism. Dolby Pro Logic II provides five channels of surround processing from any stereo source.

Virtual Surround Sound

Philips Virtual Surround Sound produces rich and immersive surround sound from a less than five-speaker system. Highly advanced spatial algorithms faithfully replicate the sonic characteristics that occur in an ideal 5.1-channel environment. Any high quality stereo

source is transformed into true-to-life, multi-channel surround sound. No need to purchase extra speakers, wires or speaker stands to appreciate room-filling sound.

One-touch with NFC

Pair Bluetooth® devices easily with one-touch NFC (Near Field Communications) technology. Just tap the NFC-enabled smartphone or tablet on the NFC area of a soundstage to turn the soundstage on, start Bluetooth® pairing, and begin streaming music.

Bluetooth

Bluetooth is a short-range wireless communication technology that is both stable and energy efficient. The technology allows for easy wireless connection to other Bluetooth devices, so you can play your favourite music from any smartphone, tablet or laptop, including the iPod or iPhone, with a Bluetooth-enabled speaker.

Works with multiple devices

Works with TVs, BD/DVD players, gaming consoles, MP3 players

Audio in

Audio in allows you to easily play your music directly from your iPod/iPhone/iPad, MP3 player or laptop via a simple connection to your Philips home cinema system. Simply connect your audio device to the Audio in jack to enjoy your music with the superior sound quality of the Philips home cinema system.

EasyLink

EasyLink lets you control multiple devices like DVD players, Blu-ray players, soundbar speakers, Home theatre systems and TVs etc. with one remote. It uses HDMI CEC industry-standard protocol to share functionality between devices through the HDMI cable. With one touch of a button, you can operate all your connected HDMI CEC-enabled equipment simultaneously. Functions like standby and play can now be carried out with absolute ease.

Low-rise profile

Low-rise profile for the perfect fit in front of your TV

Specifications

Sound

- Sound Enhancement: Night Mode, Treble and Bass Control, Virtual Surround Sound, Audio sync, Music, Voice
- Sound System: Dolby Digital, Dolby pro-logic 2
