PHILIPS

Highlights

SoundSphere

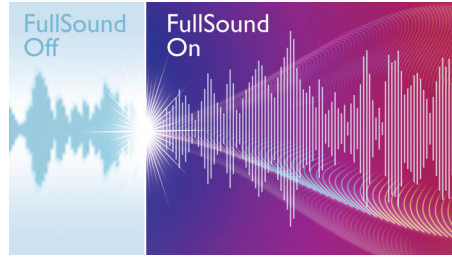

Bask in the glory and energy of music as SoundSphere gives you each note as the artist intended. Delivering clear and natural audio, SoundSphere creates a sound impression that is deeper and wider. The result is life-like audio that will make you believe the artists are performing before you. Each SoundSphere speaker features a tweeter that hangs above the speaker box. The tweeter is able to emit sound more clearly and in all directions. Precise audio crossover engineering and careful positioning of the woofer to embrace the tweeter ensures minimized interference and even more natural sound.

Aluminum speakers

Let nature bring you its best. Natural materials have proven themselves unbeatable as acoustic building components. Speakers made with aluminum are more rigid, forming a more ideal enclosure that naturally impedes vibrations, optimizes soundwave propagation and produces more fidelity sound. The result is gorgeous looking speakers that give you sound that stays true to the original recording.

FullSound

Philips' innovative FullSound technology faithfully restores sonic details to compressed music, dramatically enriching and enhancing it, so you can experience music without any distortion. Based on an audio post-processing algorithm, FullSound combines Philips' renowned expertise in music reproduction with the power of the latest generation Digital Signal Processor (DSP). The result is fuller bass with more depth and impact, boosted voice and instrument clarity, and rich detail. Rediscover your compressed music in true-to-life sound that will touch your soul and move your feet.

Free internet radio stations

Streamium comes with thousands of free Internet radio stations. Now you can stay abreast of all kind of music worldwide. Connect your Streamium to the Internet and listen to your favorite online programs on your audio system without having to turn on your PC.

160GB hard disk/ 2000 albums

The 160GB hard disk of this Philips sound system provides a very large capacity for you to store your PC/MAC digital music files, easily holding up to 2000 music albums. Space saving, smart music collection management, easy access and all in one place.

EISA Award 2010-2011

European Compact System
This Streamium Wi-Fi audio, complete with SoundSphere speakers, will play DVD and DivX movie files, FLAC and WAV music files and offers UPnP capability to stream MP3 music from a PC. It also play files from its USB-connected, additional 160GB hard drive, while Ethernet or Wi-Fi connection allows you to have access to Internet. The partnering aluminium SoundSphere speakers are driven from a 2x50W Class D amplifier and combine an upward-firing bass/mid unit with a separate tweeter.
