# Highlights

## Data line/phone protection

These connectors accommodate either an RJ45 or an RJ11 cord. They route either line through the surge protector to guard against spikes and surges that may occur in the data or phone lines.

## 330VA, 165W

This power rating advises how much total power you are able to back up without overloading the battery.

## Phone/data jack

MOVs or sidactor are used for protecting the phone or network lines. They protect against surges/spikes through the phone or network lines.

## 6 ft power cord

Provides power to the unit which can be 6 feet from the AC outlet.

## 6 ft USB cable

Connects computer to UPS so that power monitor and auto shutdown can be executed.

## Phone cord

Allows you to connect a phone or fax machine

## Auto shutdown software

Ensures that all open files are saved and computer shuts down safely without completely draining the battery

## LED indicators

These LED indicators inform you of unit status at a glance
