M4501B

The purest line to connect

Designed with simplicity and elegance in mind, the Philips LINEA takes pride of place in any modern home. Precisely engineered and crafted, as reflected in its timeless architectural silhouette, the LINEA truly is a desirable work of art.

Eco-conscious product

- Zero power emission when ECO+ mode is activated

Ultimate calling experience

- Advanced sound testing and tuning for superb voice quality
- Enjoy 16 hours of talk time on a single charge
- Handset speakerphone allows you to talk hands-free
- High-contrast 4.1-cm (1.6") 2-line reverse display
- Save up to 50 of your favourite contacts in your phonebook

Outstanding design in high-quality execution

- Calibrated keys for precise dialling
- Smart cable management maintains visual appeal from all angles
- Perfectly adjusted magnetic force ensures secure docking
- Slender design and compact footprint for space efficiency
- Extra weight integrated in the base for greater stability

Highlights

ECO+ mode

Philips phones are energy efficient and designed to be respectful to the environment. When ECO mode is activated the emitted radiation is reduced by up to 60%, and up to 95% when the phone is charging. With ECO+ mode activation the radiation drops to zero.

Superb sound quality

HQ-Sound refers to high-quality acoustic engineering that results in voice quality so crisp and natural it is almost like being there in person. High-quality components, precise acoustic design, advanced testing and fine tuning reflect decades of experience in high-end audio systems and headphones.

Up to 16 hours talk time

Enjoy 16 hours of talk time on a single charge

4.1-cm (1.6") reverse display

High-contrast, white-on-black reverse LCD display ensures easy reading and also blends well with the overall sleek design language.

50-name phone book

Save up to 50 of your favourite contacts in your phonebook

Calibrated keypad

The calibrated and carefully designed keypad ensures precise dialling where you clearly feel every keystroke, whether you are dialling a number or entering a phonebook contact.

Compact footprint

Slender design and compact footprint for space efficiency

Handset speakerphone

Hands-free mode uses a built-in loudspeaker to amplify the voice of the caller, allowing you to speak and listen during a call without holding the phone to your ear. This is especially useful if you want to share the call with others or simply multitask.

Perfect look from every angle

The smart cable management system cleverly hides the wires from sight. Intelligently designed concealed sockets and an internal cable guide ensure everything is clutter-free and neatly tucked away.

Secure docking

Precisely adjusted magnets – with optimised force – are placed on the top of the handset and the base to ensure secure docking of the phone in a stable, upright position. A cleverly designed recess on the base not only serves as an attractive design highlight but also helps to guide the user's hand to make it easy to pick up the handset.

Weighted base for stability

Extra weight integrated in the base for greater stability
