# Highlights

## Full projection angle

Full projection angle for easy viewing anywhere

## Projects time and date

Projects time, date, temperature and animations

## Projection brightness control

Projection brightness control for comfort viewing

## Wake up to sound of nature

Wake up to sound of nature for a pleasant morning experience

## Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

## Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

## Repeat alarm

To counter oversleeping, the Philips Clock radio has a snooze feature. Should the alarm ring and you wish to continue sleeping a bit longer, simply press the Repeat Alarm button once and go back to sleep. Nine minutes later the alarm will ring again. You can continue to press the Repeat Alarm button every nine minutes until you turn off the alarm altogether.

## Digital tuning with presets

Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

## Temperature display

Weather information at your fingertips. The Philips Clock radio gives you the most current

temperature available. Its smart temperature sensor displays outdoor temperature anytime.

## Preloaded relaxation music

Relax or fall asleep to peaceful sounds. The Philips Clock radio is preloaded with a number of relaxation music pieces. Simply choose from rain showers, ocean waves, spa music and more, to enjoy in relaxed comfort.

## Sleep Timer

Sleep timer lets you decide how long you want to listen to music or a radio station of your choice before falling asleep. Simply set a time limit (up to 2 hours) and choose a CD or radio station to listen to while you drift off to sleep. The set will continue to play for the selected duration and then automatically switch off to a power-efficient, silent stand-by mode. Sleep Timer lets you fall asleep to your favorite CD or radio DJ without counting sheep or worrying about wasting power.
