Start the day your way

- Rise to radio or iPod/iPhone music via Lightning connector
- Dual alarm to wake you and your partner at different times
- Gentle wake for a pleasant wake up experience
- Sleep timer for easy falling asleep to your favorite music

PHILIPS

Highlights

Dual alarm

The Philips audio system comes with two alarm times. Set one alarm time to wake you up and the other time to wake up your partner.

All-in-one remote control

With the Philips all-in-one remote control, you can now navigate both your Philips music system and your iPod/iPhone through hundreds of songs easily with the one simple press of the remote control. Displaying information listed according to playlist, album, artist, genre or track, the navigation offers speedy yet simple through hundreds of files. It allows one handed operation and guarantees a unique user experience.

Gentle wake

Start your day right by waking up gently to a gradually escalating alarm volume. Normal alarm sounds with a preset volume are either too low to wake you up or are so uncomfortably loud that you are rudely jolted

awake. Choose to wake up to your favorite music, radio station or buzzer alarm. Gentle wake's alarm volume gradually increases from subtly low to reasonably high in order to gently rouse you.

20W RMS total output power

RMS refers to Root Mean Square which is a typical measurement of audio power, or rather, the electrical power transferred from an audio amplifier to a loudspeaker, which is measured in watts. The amount of electrical power delivered to the loudspeaker and its sensitivity determines the sound power that is generated. Essentially, amplifiers are limited by the electrical energy they can amplify and loudspeakers by the electrical energy they can convert into sound energy, without distorting the audio signal. The higher the wattage, the better the sound power emitted by the speaker.

Adjustable display brightness

Adjustable display brightness allows you to customize the display to your needs.

AUDIO-IN (3.5mm)

Make one easy connection and enjoy all your music from portable devices and computers. Simply plug your device to the AUDIO-IN (3.5 mm) port on your Philips set. With computers, the connection is typically made from the headset output. Once linked, you can enjoy

your entire music collection directly, on a set of superior speakers. Philips simply delivers better sound.

Auto sync time

Auto sync time via iPod/iPhone dock with Lightning connector

FM digital tuning with presets

Digital FM radio offers you additional music options to your music collection on your Philips audio system. Simply tune into the station that you want to preset, press and hold the preset button to memorize the frequency. With preset radio stations that can be stored, you can quickly access your favorite radio station without having to manually tune the frequencies each time.

Play and charge via Lightning

Enjoy your favorite music while charging your iPod/iPhone via the new Lightning connector! Just dock it directly on the speaker to play your hand-picked tunes in superb sound. It also charges your device quickly while playing, so you don't have to work about the battery running out.

Rise to radio or iPod/iPhone
