- On-Screen Display languages: English, Dutch, German, French, Italian, Spanish
- Backlight
- Backlight color: White
- Battery low indication

Power

- Number of batteries: 3
- Battery type: AA / LR6 Alkaline
- Battery saving manager: Auto switch on/off

Infrared Capabilities

- Operating distance: 33 ft (10 m)
- Learning IR codes
- Carrier frequency range: 19kHz - 455 kHz
- Transmitting LEDs: 2

System Specifications

- Flash memory size: 4 MB

Outer Carton

- GTIN: 1 87 12581 40842 5
- Number of consumer packagings: 2
- Gross weight: 1.4 kg
- Outer carton (L x W x H): 33 x 9.9 x 16.8 cm
- Nett weight: 0.44 kg
- Tare weight: 0.96 kg

Packaging dimensions

- EAN: 87 12581 40842 8
- Number of products included: 2
- Packaging type: Carton
- Type of shelf placement: Hanging
- Packaging dimensions (W x H x D): 15.5 x 4.8 x 31.7 cm
- Gross weight: 0.44 kg
- Nett weight: 0.22 kg
- Tare weight: 0.22 kg

Highlights

15 out of 25 remote

The 15in1 controller provides the convenience of controlling up to 15 home entertainment devices with one remote control. The remote can be easily programmed to control almost any brand of almost all audio/video equipment, using the on-board IR code database. One single remote to operate all your devices, without the hassle of searching for the right remote!

Channel icons

The remote control incorporates a library of channel icons for most countries' main TV stations. Via the color LCD screen you can program the right channel icons for the right channel. Once setup, you use the LCD screen info to zap through your channels using the icons of TV stations instead of the digit keys on your remote.

Universal IR code database

A universal IR code database refers to a library of infrared codes built-in to a particular remote. This feature allows a remote to control your equipment without needing to learn individual signals. Select the correct infrared code sets in the database for the devices you want to control, to enable control of virtually every audio/video system element on the market today – regardless of model or brand.

Guided setup

Unlike other universal remote controls, where a 3-digit code needs to be input to identify a brand and device, this remote incorporates on-device step-by-step instructions to setup your equipment, regardless of brand.

Learning functionality

Learning functionality refers to the process through which a remote control captures and stores infrared signals from other remotes for later use. When device codes are not included in the on-board database, they can always be learned from the original remote, simply by pointing to it.

5.1 cm/2.0" TFT color display

The high resolution quality LCD display (220 x 175 pixel TFT display) allows great readability of the content on the screen.

Activity based user interface

Instead of operating your components one by one, activity based control blends the most commonly used functions into activities such as "Watch a movie" or "Listen to CD". When a user selects 'watch a movie', rather than having the end user address each individual piece of equipment - such as DVD player, TV and multimedia receiver -, one button holds all necessary commands to be able to start watching a movie: switch on the TV, switch on the amplifier and select the right input, switch on the the DVD player and start playing.

Automatic backlighting

No more searching for buttons in the dark, because when you pick up the remote control, the keys (or LCD display) automatically light up.
