Brita Intenza+ water filter cartridge  
for Saeco Espresso machines Improves coffee taste, Protects against limescale, Replace every 2 months

CA6702/00

## Highlights

### Intensive coffee aroma

Water is a crucial ingredient of every espresso - so for optimum taste, it's always best to filter it professionally. That's why all Saeco espresso machines can be optionally fitted with the innovative INTENZA+ water filter, which we co-developed with BRITA, the world's No. 1 in household water filters. Just set it to your location's hardness level, and its sophisticated technology does the rest. The result? Ideal water conditions for espresso with the most intense aroma.

### Adjustable filter settings

The water filter settings can be adjusted to the hardness of your water. Simply turn the adjustment ring on the Intenza+ water filter. Set it to A for soft water areas, B for medium water hardness (factory setting) or C for hard water. This will ensure optimal limescale protection and best taste.

### Efficient brewing process

The water filter ensures a constant brewing temperature and consistent pressure during the

brewing process, enhancing your espresso machine's performance.

### Reduces lime-scale

The INTENZA+ water filter helps protect your machine against the build-up of limescale from tap water, which affects the taste and aroma of your coffee.

### Longer lifetime

The water filter extends the lifespan of your espresso machine, ensuring you can enjoy the best-tasting coffee for longer.

### Click & go system

The water filter cartridge easily clicks into the water tank and is ready to use in less than 30 seconds.

### Replace every 2 months

A regular change of the cartridge is important for optimum coffee taste and for consistent protection of your coffee machine. Please replace the cartridge every two months.
