# 3 Install the car audio system

Always follow the instructions in this chapter in sequence.

These instructions are for a typical installation. However, if your car has different requirements, make the adjustment accordingly. If you have any question regarding installation kits, consult your local retailer.

**Note**

• This system is designed for negative ground (earth) 12V DC operation only.
• Always install this system in the car dashboard. Other locations can be dangerous as the rear of the system heats up during use.
• To avoid short-circuit: before you connect, make sure that the ignition is off.
• Make sure that you connect the yellow and red power supply leads after all other leads are connected.
• Make sure that all loose leads are insulated with electrical tape.
• Make sure that the leads do not get caught under screws iron parts that will move (e.g. seat rail).
• Make sure that all ground (earth) leads are run to a common ground (earth) point.
• Use only the supplied mounting hardware for a safe and secure installation.
• Improper fuses can cause damage or fire. When you need to change the fuse, consult a professional.
• When you connect other devices to this system, make sure that the rating of the car circuit is higher than the total fuse value of all the connected devices.
• Never connect speaker wires to the metal body or chassis of the car.
• Never connect speaker wires with stripes to one another.

## Connect wires

**Note**

• The ISO male connectors are not supplied.
• Make sure that all loose leads are insulated with electrical tape.
• Consult a professional to connect wires as instructed below.

**1** Check the car's wiring carefully and connect them to the ISO male connectors.

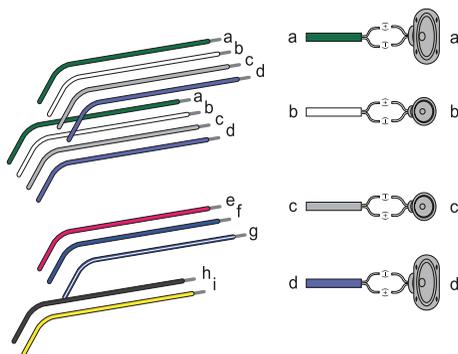

| | ISO male connectors | Connect to |
|---|---|---|
| a | Green strip, black-edged green strip | Rear left speaker |
| b | White strip, black-edged white strip | Front left speaker |
| c | Gray strip, black-edged gray strip | Front right speaker |
| d | Purple strip, black-edged purple strip | Rear right speaker |
| e | Red strip | Ignition key +12V DC when ON/ACC |
| f | Blue strip | Motor/electric antenna relay control lead |
| g | White-edged blue strip | Amplifier relay control lead |
| h | Black strip | Ground |

| | ISO male connectors | Connect to |
|---|---|---|
| i | Yellow strip | To the +12V car battery which is energized at all times |

**2** Connect the antenna and amplifier as illustrated, if applicable.

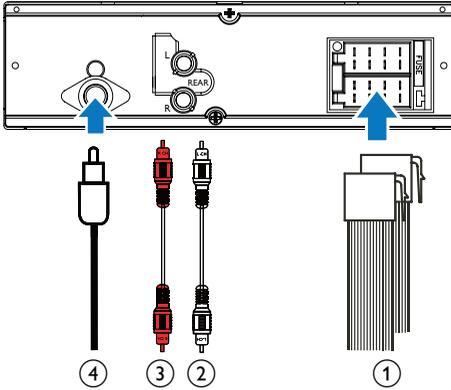

| | Sockets on rear panel | External sockets or connectors |
|---|---|---|
| 1 | For ISO male connectors | As indicated above |
| 2 | **REAR L** | Rear left speaker |
| 3 | **REAR R** | Rear right speaker |
| 4 | **ANTENNA** | Antenna |

✳ Tip

• The pin arrangement for the ISO connectors depends on the type of your vehicle. To avoid damage to the unit, connect properly.

## Mount into the dashboard

• If the car does not have an on-board drive or navigation computer, disconnect the negative terminal of the car battery.
• If the car battery is not disconnected, to avoid short-circuit, make sure that the bare wires do not touch each other.

**1** Make sure that the car dashboard opening is within these measurements:

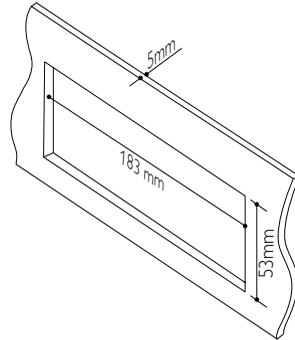

**2** Remove the mounting sleeve with the supplied disassembly tools.

**3** Install the sleeve into the dashboard and bend the tabs outward to fix the sleeve.
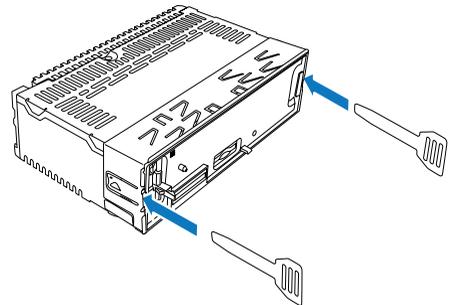

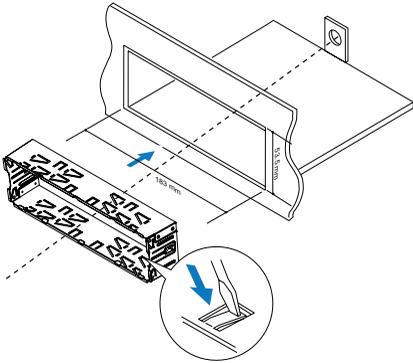

**4** Slide the unit into the sleeve until you hear a "click".
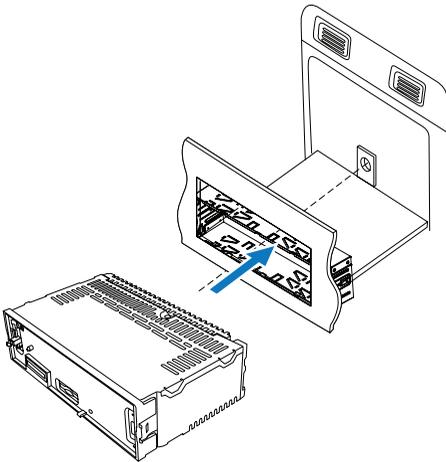

**5** Attach the trim plate.
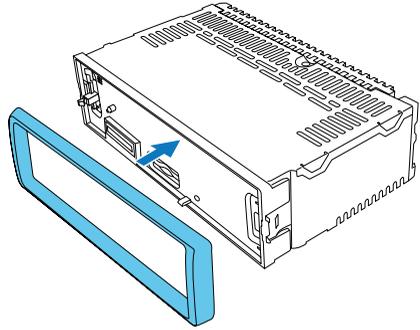

**6** Reconnect the negative terminal of the car battery.

## Attach the front panel

**1** Insert the notch on the front panel to the chassis on the main unit.
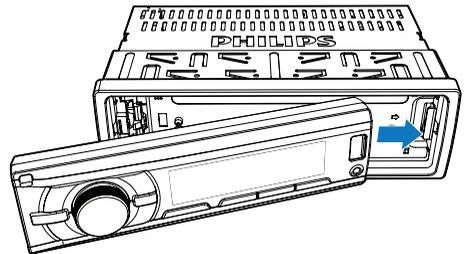

**2** Press the left end of the front panel inwards until it is securely locked with a "click".
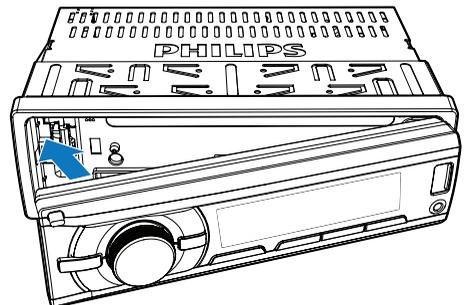

## Detach the front panel

**Note**

- Before you insert an SD/SDHC card or reset the system, detach the front panel.
- Before you detach the front panel, make sure that the system is turned off.

**1** Press ⏏ to release the front panel.

**2** Pull the front panel outwards to remove it.
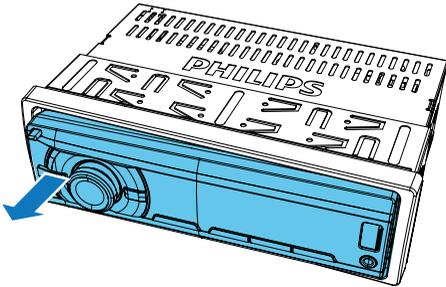

# 4 Get started

## For the first time use

# 12 Troubleshooting

⚠️ **Warning**

- Never remove the casing of this product.

To keep the warranty valid, never try to repair the product yourself.

If you encounter problems when using this product, check the following points before requesting service. If the problem remains unsolved, go to the Philips Web page (www.philips.com/support). When you contact the Consumer Care, make sure that the product is nearby and the model number and serial number are available.

### No power or no sound

- The power supply from car battery is cut off, or the car battery runs out of energy. Power the system with car battery.
- Car engine is not on. Turn the car engine on.
- Cable is not correctly connected. Check connections.
- The fuse is burnt. Replace the fuse.
- Volume is too low. Adjust volume.
- If the above solutions cannot help, press the **RESET** button.
- Make sure that the current track is in a compatible format.

### Noise in broadcasts

- Signals are too weak. Select other stations with stronger signals.
- Check the connection of the car antenna.
- Change the broadcast setting from stereo to mono.

### Preset stations are erased.

- Battery cable is not correctly connected. Connect the battery cable to the terminal that is always live.

### Cannot switch the source to iPod/iPhone

- Check whether the iPod/iPhone is securely connected.
- Check whether the iPod/iPhone is compatible with this system.
- Check whether the iPod/iPhone battery is nearly empty. Connect it to this system for charging first.

# 13 Notice

Any changes or modifications made to this device that are not expressly approved by WOOX Innovations may void the user's authority to operate the equipment.

## Care of the environment

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

When this crossed-out wheeled bin symbol is attached to a product it means that the product is covered by the European Directive 2002/96/EC. Please inform yourself about the local separate collection system for electrical and electronic products.

Please act according to your local rules and do not dispose of your old products with your normal household waste.

Correct disposal of your old product helps to prevent potential negative consequences for the environment and human health.

**Environmental information**

All unnecessary packaging has been omitted. We have tried to make the packaging easy to separate into three materials: cardboard (box), polystyrene foam (buffer) and polyethylene (bags, protective foam sheet.)

Your system consists of materials which can be recycled and reused if disassembled by a specialized company. Please observe the local regulations regarding the disposal of packaging materials, exhausted batteries and old equipment.
