#### Install the car audio

These instructions are for typical installations. However, if you have different requirements, follow the corresponding adjustment. If you have any questions regarding installation, it's recommended to contact your local distributor or Philips customer service.

#### Mount in the dashboard [2]

This unit is designed for negative ground connection. Before you mount the unit in the dashboard, make sure that all negative ground connection leads are insulated with crimp sleeves. If necessary, strip the insulation from the ends of the leads and connect them to the car's negative terminal. If the car does not have an on-board drive or navigation computer, disconnect the negative terminal of the car battery. If you disconnect the car battery, ensure that the ignition is off. If there is no fuse holder, turn off the power supply leads after all other leads are connected. Ensure that all leads are insulated with crimp sleeves. Make sure that all leads are run under the car's bodywork. Ensure that all leads are run to a common ground (earth) point. Use only the supplied mounting hardware for a safe and secure installation. Improper use can cause damage or fire. When you need to change the fuse, consult a professional.

**Note on the power supply lead (yellow)**  
When you connect the power lead to this system, ensure that the rating of the car circuit is higher than the total sum of values of all the connected devices.

#### Notes on speaker connection

- Never connect speaker wires to the metal body or frame of the car.
- Never connect speaker wires with stripes to one another.

#### Adjust screen

To adjust screen brightness/contrast/color  
1 Press **DISP/SCROLL**.  
2 Press **▲** or **▼** to select an item.  
3 Touch **◆** to adjust the value.  
4 Press **DISP/SCROLL** to confirm.  
To turn off the screen, press and hold **DISP/SCROLL**.

#### Turn on

**Caution**  
• Risk of road accidents! Never watch video or adjust settings while you drive.  
1 Press **●** to turn on the unit.  
The available OSD (On-Screen Display) languages are displayed.
