- Master carton weight: 5.1 kg
- Product dimensions (WxDxH): 360mm x 128mm x 283mm
- Set weight: 4.2 kg

Product highlights

Universal Plug & Play
Universal Plug & Play is an industry standard technology that lets you connect to any Universal Plug & Play enabled device to receive or transmit music. Your Wireless Music Centre utilises Universal Plug & Play to ensure an easy and standard way to connect to other Universal Plug & Play enabled devices. You can easily connect your Wireless Music Centre to other media devices to receive or to transfer content.

Super Sound Panel
Super Sound Panel is an innovative, flat speaker panel that uses cutting-edge technology to provide high quality, full-range audio from a flat and compact speaker unit.

Class D Amplifier
Class 'D' digital amplifier takes an analogue signal, converts it into a digital signal and then amplifies the signal digitally. The signal then enters a demodulation filter to give the final output. The amplified digital output delivers all the advantages of digital audio, including improved sound quality. In addition, Class 'D' digital amplifier has greater than 90% efficiency compared to traditional AB amplifiers. This high efficiency translates into a powerful amplifier with a small footprint.

Wireless Streaming
With wireless streaming, you don't have to wait to download and store a large file on your audio device before listening to your favourite songs. Instead, the music is sent in a continuous stream and is played as it arrives to up to five music stations at the same time. Your music can now follow you everywhere in your home.

USB Direct
With the USB Direct mode, you can simply select the music on a USB memory stick and playback all your content through the centre. All you have to do is plug in your USB memory stick to playback music or export content from the Wireless Music Centre to the device.
