Highlights

3 m cable

A handy cable length to make it easier for you to move around freely while using your headphones.

40 mm speaker driver

The 40 mm speaker driver is made of a composite Mylar material for a highly sensitive yet powerful element that delivers sound without audible distortion.

Single-sided cable

The cable is conveniently connected to just one side, considerably reducing the risk of tangling and simplifying winding the cable up for storage.

Easy to adjust headband

The easy to adjust mechanism provides a comfortable, close fitting acoustic seal between the ear cushion and ear, ensuring optimal performance.

Gold-plated adapter

Be assured of a perfect connection and high-quality sound regardless of whether your audio devices are fitted with 3.5 or 6.35 mm jack sockets.

Full-size design

The full-size ear shells of these Philips headphones not only cover your whole ear for better sound quality, but also provide space for a larger, higher-performance driver.

LC-OFC cable

The extremely pure copper used for this cable minimises transmission losses and delivers superb signal quality to the headphone and pure sound to your ears.
